**The Vinland Sagas** 2008-11-19 The all-time bestselling of the sagas in Penguin Classics, The Vinland Sagas are published here in a vibrant new translation. Consisting of The Saga of the Greenlanders and Eirik the Red's Saga, they chronicle the adventures of Eirik the Red and his son, Leif Eirikson, who explored North America 500 years before Columbus. Famous for being the first-ever descriptions of North America, and written down in the early thirteenth century, they recount the Icelandic settlement of Greenland by Eirik the Red, the chance discovery by seafaring adventurers of a mysterious new land, and Eirik's son Leif the Lucky's perilous voyages to explore it.

**Excess Face Height Malocclusion** Sten Linder-Aronson 2000 Spanning 30 years of carefully controlled work, this book explains how nasal obstructions, the relationship between breathing patterns and vertical facial

development, and secondary neuromuscular adaptations to obstructions may alter facial and dental structures. The authors describe radiographic techniques, enlargements, and measurements for both the lateral cephalogram and the 45-degree oblique view. Their discussion of clinical application of vertical changes in the jaws and dentition is a tour de force for the orthodontist, rhinologist, and pediatrician.

**Weak Without Him** Lyra Parish 2014-03-30 "Love is an emotion that will destroy you if you let it. It can ruin your life or create a new one. Jealousy isn't much different." Jennifer Downs treads in dangerous waters. Finnley Felton is unaware. With the help of Lady Luck, they will make it through. Or will they? Texas is

nothing compared to Vegas but among the bright lights and busy streets, Jennifer discovers who she is. Her life has changed, and for better or worse, she continues to live like tomorrow will never come. Sabotage. Hatred. Betrayal. Although love is beautiful and kind, it comes with consequences. Jennifer finds herself fighting. Fighting for her rights, for love, for Finnley, and for her life. Hearts may be broken. Lives will change. But the ultimate question remains: can love win all?

**Transfer Learning** Qiang Yang 2020-01-31 Transfer learning deals with how systems can quickly adapt themselves to new situations, tasks and environments. It gives machine learning systems the ability to leverage auxiliary data and models to help solve target problems when there is only a small amount of data available. This makes such systems more reliable and robust, keeping the machine learning model faced with unforeseeable changes from deviating too much from expected performance. At an enterprise level, transfer learning allows knowledge to be reused so experience gained once can be repeatedly applied to the real world. For example, a pre-trained model that takes account of user privacy can be downloaded and adapted at the edge of a computer network. This self-contained, comprehensive reference text describes the standard algorithms and demonstrates how these are used in different transfer learning paradigms. It offers a solid grounding for newcomers as well as new insights for seasoned researchers and developers.

*Calcium and Bone Disorders in Children and Adolescents*

J. Allgrove 2015-06-11 There has been a rapid expansion of knowledge in the field of paediatric calcium and bone disorders over the past twenty years. Advances have been made in the underlying genetic basis for many conditions in conjunction with progress in bone density and geometry imaging and the development of new treatment options. The 2nd revised edition of 'Calcium and Bone Disorders in Children and Adolescents' presents up-to-date information on many aspects included in the 1st

edition such as the physiology, pathology, diagnosis and management of numerous conditions including a chapter of case histories illustrating clinical aspects. New chapters on skeletal dysplasias, the genetics of osteoporosis, radiological imaging of bone and a practical approach to a child with recurrent fractures are included. Providing a comprehensive update, this book is a useful clinical resource for paediatricians and specialists in endocrinology, metabolic bone disease, nephrology, rheumatology, radiology, orthopaedics and clinical genetics who may be faced with a child with a calcium and/or bone disorder.

Text, Speech, and Dialogue Kamil Ekštejn 2021-08-30 This book constitutes the proceedings of the 24th International Conference on Text, Speech, and Dialogue, TSD 2021, held in Olomouc, Czech Republic, in September 2021.\* The 2 keynote speeches and 46 papers presented in this volume were carefully reviewed and selected from 101 submissions. The topical sections "Text", "Speech", and "Dialogue" deal with the following issues: speech recognition; corpora and language resources; speech and spoken language generation; tagging, classification and parsing of text and speech; semantic processing of text and speech; integrating applications of text and speech processing; automatic dialogue systems; multimodal techniques and modelling, and others. \* Due to the COVID-19 pandemic the conference was held in a "hybrid" mode.

Monocots: Systematics and Evolution Karen L Wilson

2000-05-19 Monocots: Systematics and Evolution presents leading work from around the world on non-grass monocotyledons and includes reviews and current research into their comparative biology, phylogeny and classification. The papers are based on presentations at the Second International Conference on the Comparative Biology of the Monocotyledons, Monocots II, held in Sydney, Australia in late 1998. Many were subsequently updated or extended to take into account new information. All 72 papers have been peer-reviewed.

*Advances in Data Mining* Petra Perner 2004-11-15 The

Industrial Conference on Data Mining ICDM-Leipzig was the fourth meeting in a series of annual events which started in 2000, organized by the Institute of Computer Vision and Applied Computer Sciences (IBaI) in Leipzig. The mission of the conference is to bring together researchers and people from industry in order to discuss together new trends and applications in data mining. This year a broad spectrum of work of different applications was presented ranging from image mining, medicine and biotechnology, management and environmental control, to telecommunications. Besides that an industrial exhibition showed the successful application of data mining methods by industries in different areas such as medical devices, mass data management systems, data mining tools, etc. During the discussion many projects were inspired leading to new and joint work. The fruitful discussions, the exchange of ideas and the spirit of the conference made it a remarkable event for both sides, industry and research. We would like to express our appreciation to the reviewers for their precise and highly professional work. We appreciate the help and understanding of the editorial staff at Springer and in particular Alfred Hofmann, who supported the publication of these proceedings in the LNAI series. Last, but not least, we wish to thank all speakers, participants and industrial exhibitors who contributed to the success of the conference. We are looking forward to welcoming you to ICDM 2005 ([www.data-mini-forum.de](http://www.data-mini-forum.de)) and to the new work you will present there.

*Down the Road* Lee Blessing 1991 THE STORY: DOWN THE ROAD centers on a convicted serial killer and the husband and wife writing team hired to help him write an account of his crimes. The killer, Bill Reach, has admitted to the murders of nineteen women, but there may have been more.  
*Hydraulic Fracture Mechanics* Peter Valkó 1995 The book explores the theoretical background of one of the most widespread activities in hydrocarbon wells, that of hydraulic fracturing. A comprehensive treatment of the basic phenomena includes: linear elasticity, stresses, fracture geometry and rheology. The diverse concepts of

mechanics are integrated into a coherent description of hydraulic fracture propagation. The chapters in the book are cross-referenced throughout and the connections between the various phenomena are emphasized. The book offers readers a unique approach to the subject with the use of many numerical examples.

**Environmental Aspects of the Transuranics** F. M. Martin 1975

**Cellular Radio and Personal Communications** Theodore S. Rappaport 1995 This collection of 40 articles will be invaluable to students, practicing engineers, and researchers. Leaders in the field give key information on fundamental system design, speech coding, cellular networking, modulation techniques, and standards in some of the most useful papers available.

**Looptail** Bruce Poon Tip 2013-09-24 Can a company be cool, socially responsible ... and still make money? Welcome to the looptail. This is the extraordinary true story of Bruce Poon Tip and how, with nothing more than two credit cards and a burning desire to create an authentic, sustainable travel experience like nothing the world had ever seen, he created G Adventures, the world's most successful adventure travel company. G Adventures operates in more than 100 countries, on all seven continents, serves more than 100,000 customers every year - and is now a significant player in Australia. In this unique first-person account, Poon Tip reveals his unusual management secrets that allowed him to keep growing his company, his employees fully engaged and energised, and his customers extremely happy. This is a singularly stunning story of why community, culture and karma matter in business, and how one man's desire to do the right thing and generate profits can be blended into a win-win for all involved. In this special Australian edition, Bruce Poon Tip writes about the

unique experiences and lessons learned which have fuelled the growth of his Australian business, and also about how Australia really could be better at presenting itself to the world's travellers. [www.gadventures.com.au](http://www.gadventures.com.au)  
*Mechanisms of Insulin Action* Alan R. Saltiel 2007-10-05  
More than 18 million people in the United States have diabetes mellitus, and about 90% of these have the type 2 form of the disease. This book attempts to dissect the complexity of the molecular mechanisms of insulin action with a special emphasis on those features of the system that are subject to alteration in type 2 diabetes and other insulin resistant states. It explores insulin action at the most basic levels, through complex systems.

**Ten Cate's Oral Histology** Antonio Nanci 2008  
Accompanying CD-ROM contains ... "150 color images with legends, 472 book figures with legends, 438 multiple choice test questions, and 119 interactive drag-and-drop exercises." -- from CD-ROM Welcome screen.  
*Applied Machine Learning* M. Gopal 2019-06-05 Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. Cutting-edge machine learning principles, practices, and applications This comprehensive textbook explores the theoretical underpinnings of learning and equips readers with the knowledge needed to apply powerful machine learning techniques to solve challenging real-world problems. *Applied Machine Learning* shows, step by step, how to conceptualize problems, accurately represent data, select and tune algorithms, interpret and analyze results, and make informed strategic decisions. Presented in a non-rigorous mathematical style, the book covers a broad array of machine learning topics with special emphasis on methods that have been profitably employed. Coverage includes: •Supervised learning•Statistical learning•Learning with support vector machines (SVM)•Learning with neural networks (NN)•Fuzzy inference systems•Data clustering•Data

transformations•Decision tree learning•Business intelligence•Data mining•And much more

**Elements of Statistical Mechanics** Ivo Sachs 2006-05-11  
This 2006 textbook provides a concise introduction to the key concepts and tools of statistical mechanics. It also covers advanced topics such as non-relativistic quantum field theory and numerical methods. After introducing classical analytical techniques, such as cluster expansion and Landau theory, the authors present important numerical methods with applications to magnetic systems, Lennard-Jones fluids and biophysics. Quantum statistical mechanics is discussed in detail and applied to Bose-Einstein condensation and topics in astrophysics and cosmology. In order to describe emergent phenomena in interacting quantum systems, canonical non-relativistic quantum field theory is introduced and then reformulated in terms of Feynman integrals. Combining the authors' many years' experience of teaching courses in this area, this textbook is ideal for advanced undergraduate and graduate students in physics, chemistry and mathematics.

**Applications of Supply Chain Management and E-Commerce Research** Joseph Geunes 2006-03-30  
In February 2002, the Industrial and Systems Engineering (ISE) Department at the University of Florida hosted a National Science Foundation Workshop on Collaboration and Negotiation in Supply Chain Management and E-Commerce. This workshop focused on characterizing the challenges facing leading edge firms in supply chain management and electronic commerce, and identifying research opportunities for developing new technological and decision support capabilities sought by industry. The audience included practitioners in the areas of supply chain management and E-Commerce, as well as academic researchers working in these areas. The workshop provided a unique setting that has facilitated ongoing dialog between academic researchers and industry practitioners. This book codifies many of the important themes and issues around which the workshop discussions centered. The editors of this book, all faculty members in the ISE Department at

the University of Florida, also served as the workshop's coordinators. In addition to workshop participants, we also invited contributions from leading academics and practitioners who were not able to attend. As a result, the chapters herein represent a collection of research contributions, monographs, and case studies from a variety of disciplines and viewpoints. On the academic side alone, chapter authors include faculty members in supply chain and operations management, marketing, industrial engineering, economics, computer science, civil and environmental engineering, and building construction departments.

**Neurochemistry of Metabolic Diseases:** Sankar Surendran 2020 "Metabolic disorder caused by altered levels of metabolism resulting pathophysiological abnormalities often leads to childhood death. Several new developments on metabolic diseases research have been emerging. Gaucher disease is a lysosomal storage disorder caused by glucocerebrosidase gene mutations resulting glucocerebrosidase deficiency. Current studies show that the same gene mutations also contribute to the Parkinson's disease. Tetrahydrobiopterin (BH4) has been widely used in treating patients with Phenylketonuria over a decade. Recent studies reveal that patients treated with BH4 over one-year period showed reduced levels of serum B12, folate and iron intake and therefore patients under chronic BH4 treatment needed to be advised to have additional micronutrients along with BH4. Macrocephaly was used as one of the important features to diagnose Canavan disease. However, a recent study showing a child with aspartoacylase gene mutation developed microcephaly. Hence, Canavan disease phenotype can be either macrocephaly or microcephaly. These are a few examples of recent developments on metabolic diseases research. Therefore, this book was aimed to compose current developments on metabolic diseases research for the use by broad spectrum of experts including Physicians, Neuroscientists, Neurologists, Biomedical researchers, Biochemists, Molecular biologists, Basic Science Researchers and Medical

Students"--

Odontogenesis Petros Papagerakis 2019-04-22 This volume provides methods and approaches to study genetic and environmental regulatory controls on odontogenesis. Chapters guide readers through protocols for isolation and characterization of both epithelial and mesenchymal dental cells, methods on isolation, phenotypic characterization, expansion, differentiation, immunofluorescence, in situ hybridization, immunohistochemistry, imaging protocols, rodent dental fluorosis model, 3D assessment of crown size, dental diseases models, next generation sequencing, genetic and epigenetic studies, genome-wide association studies as well as clinical protocols for measurement of early childhood caries and saliva, and supragingival fluids and biofilm collection and subsequent analyses. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and cutting-edge, Odontogenesis: Methods and Protocols aims to guide researchers towards elucidating the secrets and mysteries of a fascinating and unique organ, the tooth.

Petroleum Production Systems Michael J. Economides 2012-09-25 Petroleum Production Systems, Second Edition, is the comprehensive source for clear and fundamental methods for about modern petroleum production engineering practice. Written by four leading experts, it thoroughly introduces modern principles of petroleum production systems design and operation, fully considering the combined behavior of reservoirs, surface equipment, pipeline systems, and storage facilities. Long considered the definitive text for production engineers, this edition adds extensive new coverage of hydraulic fracturing, with emphasis on well productivity optimization. It presents new chapters on horizontal wells and well performance evaluation, including production data analysis and sand management. This

edition features: A structured approach spanning classical production engineering, well testing, production logging, artificial lift, and matrix and hydraulic fracture stimulation; Revisions throughout to reflect recent innovations and extensive feedback from both students and colleagues; Detailed coverage of modern best practices and their rationales; Unconventional oil and gas well design; Many new examples and problems; Detailed data sets for three characteristic reservoir types: an undersaturated oil reservoir, a saturated oil reservoir, and a gas reservoir.

Updated as of May 15, 2018 This book contains: - The complete text of the Productivity Commission Act 1998 (Australia) (2018 Edition) - A table of contents with the page number of each section

**Streamline Simulation** Akhil Datta-Gupta 2007  
**Proceedings of International Conference on Recent Advancement on Computer and Communication** Basant Tiwari 2018-04-18 The book is a compilation of best papers presented at International Conference on Recent Advancement in Computer and Communication (ICRAC 2017) organized by IMPLab Research and Innovation Foundation, Bhopal, India. The book covers all aspects of computers and communication techniques including pervasive computing, distributed computing, cloud computing, sensor and adhoc network, image, text and speech processing, pattern recognition and pattern analysis, digital signal processing, digital electronics, telecommunication technologies, robotics, VLSI technologies, embedded system, satellite communication, digital signal processing, and digital communication. The papers included are original research works of experts from industry, government centers and academic institutions; experienced in engineering, design and

research.

*Data Clustering* Guojun Gan 2007-01-01 Cluster analysis is an unsupervised process that divides a set of objects into homogeneous groups. This book starts with basic information on cluster analysis, including the classification of data and the corresponding similarity measures, followed by the presentation of over 50 clustering algorithms in groups according to some specific baseline methodologies such as hierarchical, center-based, and search-based methods. As a result, readers and users can easily identify an appropriate algorithm for their applications and compare novel ideas with existing results. The book also provides examples of clustering applications to illustrate the advantages and shortcomings of different clustering architectures and algorithms. Application areas include pattern recognition, artificial intelligence, information technology, image processing, biology, psychology, and marketing. Readers also learn how to perform cluster analysis with the C/C++ and MATLAB programming languages.

**Safety and Reliability. Theory and Applications** Marko Cepin 2017-06-14 Safety and Reliability - Theory and Applications contains the contributions presented at the 27th European Safety and Reliability Conference (ESREL 2017, Portorož, Slovenia, June 18-22, 2017). The book covers a wide range of topics, including: • Accident and Incident modelling • Economic Analysis in Risk Management • Foundational Issues in Risk Assessment and Management • Human Factors and Human Reliability • Maintenance Modeling and Applications • Mathematical Methods in Reliability and Safety • Prognostics and System Health Management • Resilience Engineering • Risk Assessment • Risk Management • Simulation for Safety and Reliability Analysis • Structural Reliability • System Reliability, and • Uncertainty Analysis. Selected special sessions include contributions on: the Marie Skłodowska-Curie innovative training network in structural safety; risk approaches in insurance and finance sectors; dynamic reliability and probabilistic

safety assessment; Bayesian and statistical methods, reliability data and testing; organizational factors and safety culture; software reliability and safety; probabilistic methods applied to power systems; socio-technical-economic systems; advanced safety assessment methodologies: extended Probabilistic Safety Assessment; reliability; availability; maintainability and safety in railways: theory & practice; big data risk analysis and management, and model-based reliability and safety engineering. Safety and Reliability - Theory and Applications will be of interest to professionals and academics working in a wide range of industrial and governmental sectors including: Aeronautics and Aerospace, Automotive Engineering, Civil Engineering, Electrical and Electronic Engineering, Energy Production and Distribution, Environmental Engineering, Information Technology and Telecommunications, Critical Infrastructures, Insurance and Finance, Manufacturing, Marine Industry, Mechanical Engineering, Natural Hazards, Nuclear Engineering, Offshore Oil and Gas, Security and Protection, Transportation, and Policy Making.

**ASBMR Primer on the Metabolic Bone Diseases and Disorders of Mineral Metabolism** 2009-12-22 EDITOR-IN-CHIEF: Clifford J. Rosen, M.D., Maine Medical Center Research Institute, Scarborough, Maine SENIOR ASSOCIATE EDITORS: Juliet E. Compston, M.D., FRCP, University of Cambridge School of Clinical Medicine, Cambridge, United Kingdom Jane B. Lian, Ph.D., University of Massachusetts Medical School, Worcester, Massachusetts This comprehensive yet concise handbook is an indispensable

reference for the many clinicians who see patients with disorders of bone formation, metabolic bone diseases, or disorders of stone formation. It is also a crucial tool for researchers, students, and all other professionals working in the bone field. In a format designed for quick reference, it provides complete information on the symptoms, pathophysiology, diagnosis, and treatment of all common and rare bone and mineral disorders. New in this edition: detailed coverage of osteonecrosis of the jaw, more in-depth coverage of cancer and bone including new approaches to pathogenesis, diagnosis, and treatment; new approaches to anabolic therapy of osteoporosis; the latest research on Vitamin D; expanded coverage of international topics; more on the genetics of bone mass; and newer imaging techniques for the skeleton. In addition, this edition features a free, online-only appendix of medicines used to treat bone disorders and their availability around the world.

**Modern Fracturing** Michael J. Economides 2007 "Natural gas is rapidly emerging as a premier fuel for the world economy with markedly increasing trans-national trade. With proven reserves far exceeding those for crude oil, natural gas is likely to be around for centuries. This is a book about enhancing natural gas production using one of the most important and widespread well completion technologies -- hydraulic fracturing. The book addresses the way that natural gas is produced from reservoirs and then describes diagnostic techniques that can pinpoint whether the well is producing as it should or whether intervention should be undertaken, which is the central theme of this book."--Back cover.
