Given the seriousness with which Key Methods in Geography approaches all aspects of research, it will continue to find wide favour among undergraduate

geographers." - Times Higher Education Textbook Guide "All geographers, whatever their interest, need to do research. This book will help them get started in the best possible way, with thoughtful advice on everything from project design, through choice of methods, to data analysis and presentation. The editors have assembled an impressive array of authors, all experts in their chosen field." - Tim Burt, University of Durham "Excellent book. Valuable teaching aid. Well written and covers a wide range of methods thoroughly." - Sue Rodway-Dyer, Exeter University "This is an excellent book and deals with a number of topics (which I teach) outside of the tutorial module where it is a recommended text for geographers. A very useful textbook throughout a 3 year Geography programme." - Ian Harris, Bangor University Key Methods in Geography is an introduction to the principal methodological issues involved in the collection, analysis and presentation of geographical information. It is unique in the reference literature for providing an overview of qualitative and quantitative methods for human and physical geography. An accessible primer, it will be used by students as a reference throughout their degree, on all issues from research design to presentation. This second edition has been fully revised and updated and includes new chapters on internet mediated research, diaries as a research method, making observations and measurements in the field, and the analysis of natural systems. The teaching of research methods is integral to all geography courses: Key Methods in Geography, 2nd Edition explains all of the key methods with which geography undergraduates must be conversant.

**Faith and Reason** Richard Swinburne 2005-09-29 Richard Swinburne presents a new edition of the final volume of his acclaimed trilogy on philosophical theology. Faith and Reason is a self-standing examination of the implications for religious faith of Swinburne's famous arguments about the coherence of theism and the existence of God. By practising a particular religion, a person seeks to achieve some or all of three goals - that he worships and obeys God, gains salvation for himself, and helps others to attain their salvation. But not all religions commend worship, and different religions have different conceptions of salvation. Faced with these differences, Richard Swinburne argues that we should practice that religion which has the best goals and is more probably true than the creeds of other religions. He proposes criteria by which to determine the probabilities of

different religious creeds, and he argues that, while requiring total commitment, faith does not demand fully convinced belief. While maintaining the same structure and conclusions as the original classic, this second edition has been substantially rewritten, both in order to relate its ideas more closely to those of classical theologians and philosophers and to respond to more recent views. In particular he discusses, and ultimately rejects, the view of Alvin Plantinga that the 'warrant' of a belief depends on the process which produced it, and John Hick's contention that all religions offer valid paths to salvation.

*The Geography of Religion* Roger W. Stump 2008-04-04 The only book of its kind, this balanced and accessibly written text explores the geographical study of religion. Roger W. Stump presents a clear and meticulous examination of the intersection of religious belief and practice with the concepts of place and space. He begins by analyzing the factors that have shaped the spatial distributions of religious groups, including the seminal events that have fostered the organization of religions in diverse hearths and the subsequent processes of migration and conversion that have spread religious beliefs. The author then assesses how major religions have diversified as they have become established in disparate places, producing a variety of religious systems from a common tradition. Stump explores the efforts of religious groups to control secular space at various scales, relating their own uses of particular spaces and the meanings they attribute to space beyond the boundaries of their own communities. Examining sacred space as a diverse but recurring theme in religious belief, the book considers its role in religious forms of spatial behavior and as a source of conflict within and between religious groups. Refreshingly jargon-free and impartial, this text provides a broad, comparative view of religion as a focus of geographical inquiry.

**After Christianity** Gianni Vattimo 2002 In this provocative book, one of Europe's foremost philosophers contemplates the future of religion in the postmodern world.

**The Neighborhood of Gods** William Elison 2018-12-10 There are many holy cities in India, but Mumbai is not usually considered one of them. More popular images of the city capture the world's collective imagination—as a Bollywood fantasia or a slumland dystopia. Yet for many, if not most, people who live in the city, the neighborhood streets are indeed shared with local gods and guardian spirits. In *The Neighborhood of Gods*, William Elison examines the link between territory and divinity in India's most self-consciously modern city. In this densely settled environment, space is scarce, and anxiety about housing is pervasive. Consecrating space—first with impromptu displays and then, eventually, with full-blown temples and official recognition—is one way of staking a claim. But how can a marginalized community make its gods visible, and therefore powerful, in the eyes of others? *The Neighborhood of Gods* explores this question, bringing an ethnographic lens to a range of visual and spatial practices: from the shrine construction that encroaches on downtown streets, to the “tribal art” practices of an indigenous group facing displacement, to the work of image production at two Bollywood film studios. A pioneering ethnography, this book offers a creative intervention in debates on postcolonial citizenship, urban geography, and visibility in the religions of India.

**Agents of God** Jeffrey Guhin 2020-11-24 Sociologist Jeffrey Guhin spent a year and a half embedded in four high schools in the New York City area -- two of them Sunni Muslim and two Evangelical Christian. At first pass, these communities do not seem to have much in common. But under closer inspection Guhin finds several common threads: each school community holds to a conservative approach to gender and sexuality, a hostility towards the theory of evolution, and a deep suspicion of secularism. All possess a double-sided image of America, on the one hand as a place where their children can excel and prosper, and on the other hand as a land of temptations that could lead their children astray. He shows how these school communities use boundaries of politics, gender, and sexuality to distinguish themselves from the secular world, both in school and online. Guhin develops his study of boundaries in the book's first half to show how the school communities teach their children who they are not; the book's second half shows how the communities use "external authorities" to teach their children who they are. These "external authorities" -- such as Science, Scripture, and Prayer -- are experienced by community members as real powers with the ability to issue commands and coerce action. By offloading agency to these external authorities, leaders in these schools are able to maintain a commitment to religious freedom while simultaneously reproducing their moral commitments in their students. Drawing on extensive classroom observation, community participation, and 143 formal

interviews with students, teachers, and staff, this book makes an original contribution to sociology, religious studies, and education.

*Climate, Catastrophe, and Faith* Philip Jenkins 2021-04-06 One of the world's leading scholars of religious trends shows how climate change has driven dramatic religious upheavals. Long before the current era of man-made climate change, the world has suffered repeated, severe climate-driven shocks. These shocks have resulted in famine, disease, violence, social upheaval, and mass migration. But these shocks were also religious events. Dramatic shifts in climate have often been understood in religious terms by the people who experienced them. They were described in the language of apocalypse, millennium, and Judgment. Often, too, the eras in which these shocks occurred have been marked by far-reaching changes in the nature of religion and spirituality. Those changes have varied widely--from growing religious fervor and commitment; to the stirring of mystical and apocalyptic expectations; to waves of religious scapegoating and persecution; or the spawning of new religious movements and revivals. In many cases, such responses have had lasting impacts, fundamentally reshaping particular religious traditions. In *Climate, Catastrophe, and Faith* historian Philip Jenkins draws out the complex relationship between religion and climate change. He asserts that the religious movements and ideas that emerge from climate shocks often last for many decades, and even become a familiar part of the religious landscape, even though their origins in particular moments of crisis may be increasingly consigned to remote memory. By stirring conflicts and provoking persecutions that defined themselves in religious terms, changes in climate have redrawn the world's religious maps, and created the global concentrations of believers as we know them today. This bold new argument will change the way we think about the history of religion, regardless of tradition. And it will demonstrate how our growing climate crisis will likely have a comparable religious impact across the Global South.

**Communities in Action** National Academies of Sciences, Engineering, and Medicine

2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment,

poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

**The Power of Black Music** Samuel A. Floyd Jr. 1996-10-31 When Jimi Hendrix transfixed the crowds of Woodstock with his gripping version of "The Star Spangled Banner," he was building on a foundation reaching back, in part, to the revolutionary guitar playing of Howlin' Wolf and the other great Chicago bluesmen, and to the Delta blues tradition before him. But in its unforgettable introduction, followed by his unaccompanied "talking" guitar passage and inserted calls and responses at key points in the musical narrative, Hendrix's performance of the national anthem also hearkened back to a tradition even older than the blues, a tradition rooted in the rings of dance, drum, and song shared by peoples across Africa. Bold and original, *The Power of Black Music* offers a new way of listening to the music of black America, and appreciating its profound contribution to all American music. Striving to break down the barriers that remain between high art and low art, it brilliantly illuminates the centuries-old linkage between the music, myths and rituals of Africa and the continuing evolution and enduring vitality of African-American music. Inspired by the pioneering work of Sterling Stuckey and Henry Louis Gates, Jr., author Samuel A. Floyd, Jr, advocates a new critical approach grounded in the forms and traditions of the music itself. He accompanies readers on a fascinating journey from the African ring, through the ring shout's powerful merging of music and dance in the slave culture, to the funeral parade practices of the early new Orleans jazzmen, the bluesmen in the twenties, the beboppers in the forties, and the free jazz,

rock, Motown, and concert hall composers of the sixties and beyond. Floyd dismisses the assumption that Africans brought to the United States as slaves took the music of whites in the New World and transformed it through their own performance practices. Instead, he recognizes European influences, while demonstrating how much black music has continued to share with its African counterparts. Floyd maintains that while African Americans may not have direct knowledge of African traditions and myths, they can intuitively recognize links to an authentic African cultural memory. For example, in speaking of his grandfather Omar, who died a slave as a young man, the jazz clarinetist Sidney Bechet said, "Inside him he'd got the memory of all the wrong that's been done to my people. That's what the memory is...When a blues is good, that kind of memory just grows up inside it." Grounding his scholarship and meticulous research in his childhood memories of black folk culture and his own experiences as a musician and listener, Floyd maintains that the memory of Omar and all those who came before and after him remains a driving force in the black music of America, a force with the power to enrich cultures the world over.

**The Formation of Regional Religious Systems in Greater China** Jiang Wu 2022-04-21 The rise of Spatial Humanities has spurred a digital revolution in the field of Chinese studies, especially in the study of religion. Based on years of data compilation and analysis of religious sites, this book explores the formation of Regional Religious Systems (RRS) in Greater China in unprecedented scope and depth. It addresses quantitatively the enduring historical and contemporary issues of China's deep-rooted regionalism and spatially variegated cultural and religious landscape. A range of topics are explored: theoretical discussions of the concept of RRS; case studies of regional and local religious institutions; the formation of local cults and pilgrimage network; and the spread of religious networks to overseas Chinese communities and the Bon religion in Tibet. The book also considers long-standing challenges of researching with spatial data for humanities and social science research, such as data collection, integration, spatial analysis, and map creation. This book will be of interest to students and scholars in Religious Studies, Cultural Studies, Chinese Studies, Digital Humanities, Human Geography and Sociology.

The Next Christendom Philip Jenkins 2011-09-01 In this new and substantially expanded Third Edition, Philip Jenkins continues to illuminate the remarkable expansion of Christianity in the global South--in Africa, Asia, and Latin America. Drawing upon the extensive new scholarship that has appeared on this topic in recent years, he asks how the new Christianity is likely to affect the poor, among whom it finds its most devoted adherents. How should we interpret the enormous success of prosperity churches across the Global South? Politically, what will be the impact of new Christian movements? Will Christianity contribute to liberating the poor, to give voices to the previously silent, or does it threaten only to bring new kinds of division and conflict? Does Christianity liberate women, or introduce new scriptural bases for subjection? Acclaim for previous editions of The Next Christendom: Named one of the Top Religion Books of 2002 by USA Today Named One of the Top Ten Religion Books of the Year by Booklist (2002) Winner of the Christianity Today Book Award in the category of "Christianity and Culture" (2002) "Jenkins is to be commended for reminding us, throughout the often gripping pages of this lively work...that the history of Christianity is the history of innovative--and unpredictable--adaptations." --The New York Times Book Review "This is a landmark book. Jenkin's thesis is comprehensively researched; his analysis is full of insight; and his projection of the future may indeed prove to be prophetic." --Baptist Times "A valuable and provocative look at the phenomenon widely ignored in the affluent North but likely to be of enormous importance in the century ahead.... The Next Christendom is chillingly realistic about the

relationship between Christianity and Islam." --Russell Shaw, Crisis "If the times demand nothing less than a major rethinking of contemporary global history from a Christian perspective, The Next Christendom will be one of the significant landmarks pointing the way." --Mark Noll, Books & Culture

**Introduction to Human Geography** David Dorrell 2018-10

Religion in Consumer Society François Gauthier 2016-04-08 Presenting an overview of an emerging field in the study of contemporary religion, this book, together with a complementary volume Religion in the Neoliberal Age, explores issues of religion, neoliberalism and consumer society. Claiming that we have entered a new phase that implies more than the recasting of state-religion relations, the authors examine how religious changes are historically anchored in modernity but affected by the commoditization, mediatization, neoliberalization and globalization of society and social life. Religion in Consumer Society explores religion as both shaped by consumer culture and as shaping consumer culture. Following an introduction which critically analyses studies on consumer culture and integrates scholarship in the sociology of religion, this book explores the following topics: how consumerism and electronic media have shaped globalized culture, and how this is affecting religion; the dynamics and characteristics of often overlooked middle-class religion, and how these relate to globalization and differences between 'developed' and 'emerging' countries; emerging trends, and how we understand phenomena as different as mega churches and holistic spiritualistic journeys, and how the pressures of consumer culture act on religious traditions, indigenous and exogenous; the politics of religious phenomena in the Age of Neoliberalism; and the hybrid areas emerging from these reconfigurations of religion and the market. Outlining changes in both the political-institutional and cultural spheres, the contributors offer an international overview of developments in different countries and state of the art representation of religion in the new global political economy.
