Readers interested in the role of herbs and foods in healing will also find much to learn here, as I have. . . . A fine work.”—Annemarie Colbin, author of *Food and Healing* The promise and mystery of Chinese medicine has intrigued and fascinated Westerners ever since the “Bamboo Curtain” was lifted in the early 1970s. Now, in *Between Heaven and Earth*, two of the foremost American educators and healers in the Chinese medical profession demystify this centuries-old approach to health. Harriet Beinfield and Efrem Korngold, pioneers in the practice of acupuncture and herbal medicine in the United

States for over eighteen years, explain the philosophy behind Chinese medicine, how it works and what it can do. Combining Eastern traditions with Western sensibilities in a unique blend that is relevant today, *Between Heaven and Earth* addresses three vital areas of Chinese medicine—theory, therapy, and types—to present a comprehensive, yet understandable guide to this ancient system. Whether you are a patient with an aggravating complaint or a curious intellectual seeker, *Between Heaven and Earth* opens the door to a vast storehouse of knowledge that bridges the gap between mind and body, theory and practice, professional and self-care, East and West. “Groundbreaking . . . Primal Body, Primal Mind
Nora Gedgaudas

2011-05-27 Combining your body's Paleolithic needs with modern nutritional and medical research for complete mind-body wellness • Provides sustainable diet strategies to curb sugar cravings, promote fat burning and weight loss, reduce stress and anxiety, improve sleep and moods, increase energy and immunity, and enhance memory and brain function • Shows how our modern diet leads to weight gain and "diseases of civilization"--such as cancer, osteoporosis, metabolic syndrome, heart disease, and ADD • Explains how diet affects the brain, hormone balance, and the aging process and the crucial role of vitamin D in cancer and disease prevention Examining the healthy lives of our pre-agricultural Paleolithic ancestors and the marked decline in stature, bone density, and dental health and the increase in birth defects, malnutrition, and disease following the

implementation of the agricultural lifestyle, Nora Gedgaudas shows how our modern grain- and carbohydrate-heavy low-fat diets are a far cry from the high-fat, moderate-protein hunter-gatherer diets we are genetically programmed for, leading not only to lifelong weight gain but also to cravings, mood disorders, cognitive problems, and "diseases of civilization"--such as cancer, osteoporosis, metabolic syndrome (insulin resistance), heart disease, and mental illness. Applying modern discoveries to the basic hunter-gatherer diet, she culls from vast research in evolutionary physiology, biochemistry, metabolism, nutrition, and chronic and degenerative disease to unveil a holistic lifestyle for true mind-body health and longevity. Revealing the primal origins and physiological basis for a high-fat, moderate-protein, starch-free diet and the importance of adequate omega-3

intake--critical to our brain and nervous system but sorely lacking in most people's diets--she explains the nutritional problems of grains, gluten, soy, dairy, and starchy vegetables; which natural fats promote health and which (such as canola oil) harm it; the crucial role of vitamin D in cancer and disease prevention; the importance of saturated fat and cholesterol; and how diet affects mental health, memory, cognitive function, hormonal balance, and cellular aging. With step-by-step guidelines, recipes, and meal recommendations, this book offers sustainable strategies for a primally based, yet modern approach to diet and exercise to reduce stress and anxiety, lose weight, improve sleep and mood, increase energy and immunity, enhance brain function, save money on groceries, and live longer and happier.
