Three Days in May Edward Jay Epstein 2012-04-27 A veteran journalist continues his "exhaustively researched" (The Guardian) investigation of Dominique Strauss-Kahn. Here investigative reporter Edward Jay Epstein casts fresh doubt on the events surrounding a now-infamous sexual encounter between Dominique Strauss-Kahn—better known by his initials, "DSK"—and a Guinean-born maid at New York's Sofitel hotel. Epstein shows that DSK, then managing director at the IMF and a leading contender to unseat Nicolas Sarkozy as president of France, was under close surveillance both before and after the incident. Just two days before, French authorities intercepted a sensitive phone conversation with DSK in Washington, DC. It looks as if he was carrying his own bug: a smart phone. The surveillance also continued to New York: as Epstein shows, the staff of the Sofitel can be seen watching DSK throughout his stay. Also examined is DSK's BlackBerry cell phone, which was likely compromised by French intelligence. Just before DSK left the Sofitel, the phone went missing, and it has never been found. Included in this ebook edition is a collection of documents related to the case, including key-card records (tracking who entered DSK's suite) and never-before-released CCTV surveillance footage. DSK also goes on the record about the case for the first time with an American journalist. Epstein shows that if there was a conspiracy against DSK, as many now believe, it was an after-the-fact one in which DSK's political opponents learned of the sexual incident at the Sofitel through surveillance and shaped it into a major scandal that changed the course of French politics.

Surveillance in the Time of Insecurity Torin Monahan 2010 Threats of terrorism, natural disaster, identity theft, job loss, illegal immigration, and even biblical apocalypse—all are perils that trigger alarm in people today. Although there may be a factual basis for many of these fears, they do not simply represent objective conditions. Feelings of insecurity are instilled by politicians and the media, and sustained by urban fortification, technological surveillance, and economic vulnerability. *Surveillance in the Time of Insecurity* fuses advanced theoretical

accounts of state power and neoliberalism with original research from the social settings in which insecurity dynamics play out in the new century. Torin Monahan explores the counterterrorism-themed show 24, Rapture fiction, traffic control centers, security conferences, public housing, and gated communities, and examines how each manifests complex relationships of inequality, insecurity, and surveillance. Alleviating insecurity requires that we confront its mythic dimensions, the politics inherent in new configurations of security provision, and the structural obstacles to achieving equality in societies.

The book starts by providing the foundation for micro knowledge management through knowledge systematisation, analysing the nature of knowledge and by evaluating verification and validation technology for knowledge based system of frameworks for knowledge capture, reuse and development. A number of integrations are also provided. Web based framework for knowledge capture and delivery is becoming increasingly popular. Evolutionary computing is also used to automate design knowledge capture. The book demonstrates frameworks and techniques to capture knowledge from people, data and process and reuse the knowledge using an appropriate tool in the business. Therefore, the book bridges the gap between the theory and practice. New Perspectives on Sport and 'Deviance' Tim Crabbe 2004-09-23 The everyday makeup of contemporary sport is increasingly characterised by a perceived explosion of 'deviance' - violence, drug taking, racism, homophobia, misogyny, corruption and excess. Whereas once these behaviours may have been subject to the moral judgments of authority, in the face of dramatic socio-cultural change they become more a matter of populist consumer gaze. In addressing these developments this book provides a new and insightful approach toward the study of 'deviance' in the realm of sport. *New Perspectives in Sport and 'Deviance'* awakens the sociology of sport to the possibilities of re-imagining 'deviance' and offers an evocative approach which will appeal both to academics and students in the field of sociology of sport and sociology of deviance.

The New Media of Surveillance Shoshana Magnet 2013-09-13 The spread of new surveillance technologies is an issue of major concern for democratic societies. More ubiquitous and sophisticated monitoring techniques raise profound questions for the very possibility of individual autonomy and democratic government. Innovations in surveillance systems require equally innovative approaches for analyzing their social and political implications, and the field of critical communication studies is uniquely equipped to provide fresh insights. This book brings together the work of a number of critical communication scholars who take innovative approaches to examining the surveillance dimensions of new media technologies. The essays included in this volume focus on interactive networks, computer generated imagery, biometrics, and intelligent transport systems as sites where communication and surveillance have become virtually inseparable social processes. This book was originally published as a special issue of *The Communication Review*.

Networking Tatiana Bazzichelli 2009-02 Networking means to create nets of relations, where the publisher and the reader, the artist and the audience, act on the same level. The book is a first tentative reconstruction of the history of artistic networking in Italy, through an analysis of media and art projects which during the past twenty years have given way to a creative, shared and aware use of technologies, from video to computers, contributing to the creation of Italian hacker communities. The Italian network proposes a form of critical information,

disseminated through independent and collective projects where the idea of freedom of expression is a central theme. In Italy, thanks to the alternative use of Internet, during the past twenty years a vast national network of people who share political, cultural and artistic views has been formed. The book describes the evolution of the Italian hacktivism and net culture from the 1980s till today. It builds a reflection on the new role of the artist and author who becomes a networker, operating in collective nets, reconnecting to Neoavant-garde practices of the 1960s (first and foremost Fluxus), but also Mail Art, Neoism and Luther Blissett. A path which began in BBSes, alternative web platforms spread in Italy through the 1980s even before the Internet even existed, and then moved on to Hackmeetings, to Telestreet and networking art by different artists such as 0100101110101101.ORG, [epidemiC], Jaromil, Giacomo Verde, Giovanotti Mondani Meccanici, Correnti Magnetiche, Candida TV, Tommaso Tozzi, Federico Bucalossi, Massimo Contrasto, Mariano Equizzi, Pigreca, Molleindustria, Guerriglia Marketing, Sexyshock, Phag Off and many others.
