Essential Circuits Reference Guide John Markus 1988 A guide to research, this volume includes 925 studies of Chaucer written between 1900 and 1984. Each entry is listed once, alphabetically, under an appropriate topic heading or under the title of the work it treats most directly. The

annotations provide bibliographic information, identify the primary focus of the item annotated, and summarize its content. See entry PR1868. These classic circuits were chosen from Markus' Sourcebook of electronic circuits (1968), Electronics circuits manual (1971), and Guidebook of electronics circuits (1974). With circuit integration onto chips, many older circuits have become obsolete. This guide is a distillation of those circuits still in use today for which parts are still available. Among other topics, coverage includes disarmament, environmental issues, international law, military history, and peace theory and research. Four hundred twenty-one institutions are covered, out of more than 750 surveyed in the course of the project. Collections include libraries, archives, art and museum collections, map, recording, photo, and film collections, and data banks. Organizations include research centers, information offices, university programs, government agencies, and associations. For each, directory information is given, along with a description of relevant resources and

activities in terms of size, content, and organization of collections; programs; and products (published and unpublished, classified and unclassified). *Scholars' Guide to Washington, D.C., for Peace and International Security Studies* is the fifteenth in the series of *Scholars' Guides* edited by Zdenek V. David, librarian at the Woodrow Wilson International Center for Scholars in Washington, D.C. It was prepared in collaboration with the United States Institute of Peace.
