Josh Clark and Chuck Bryant started the podcast *Stuff You Should Know* back in 2008 because they were curious—curious about the world around them, curious about what they might have missed in their formal educations, and curious to dig deeper on stuff they thought they understood. As it turns out, they aren't the only curious ones. They've since amassed a rabid fan base, making *Stuff You Should Know* one of the most popular podcasts in the world. Preliminary Automated Dental Health

Interviewing Ronald J. Bognore 1971
Non-optimal dental histories are prevalent today, even though histories have long been regarded as essential to informed and thorough patient care. A preliminary automated dental history interview was devised incorporating a minicomputer, a cathode-ray screen, magnetic tape storage, and a teletype keyboard. Questions were displayed on the cathode-ray screen, and responses were entered by the patient via the teletype keyboard. Answers were stored on magnetic tape for future reference and research. The sequence and amount of questions were dependant on the responses made by the patient; the program branched for further detail whenever necessary. A printed, syntactical summary was typed out by the teletype upon completion

of the interview. Patient and doctor reaction was favorable and enthusiastic about the man-machine interface. Completion time ranged from twelve to twenty-five minutes. Average time was seventeen minutes. Automated dental health interviewing in this preliminary study proved suitable in eliminating the faults of the old systems, such as non-standardized recording techniques, illegible records, and inaccessibility of histories for statistical research purposes. Teeth Mary Otto 2017-03-14 An NPR Best Book of 2017 "[Teeth is] . . . more than an exploration of a two-tiered system—it is a call for sweeping, radical change." —New York Times Book Review "Show me your teeth," the great naturalist Georges Cuvier is credited with saying, "and I will tell you who you are." In this shattering new work, veteran health journalist Mary Otto looks inside America's mouth, revealing unsettling truths about our unequal society. *Teeth* takes readers on a disturbing

journey into America's silent epidemic of oral disease, exposing the hidden connections between tooth decay and stunted job prospects, low educational achievement, social mobility, and the troubling state of our public health. Otto's subjects include the pioneering dentist who made Shirley Temple and Judy Garland's teeth sparkle on the silver screen and helped create the all-American image of "pearly whites"; Deamonte Driver, the young Maryland boy whose tragic death from an abscessed tooth sparked congressional hearings; and a marketing guru who offers advice to dentists on how to push new and expensive treatments and how to keep Medicaid patients at bay. In one of its most disturbing findings, *Teeth* reveals that toothaches are not an occasional

inconvenience, but rather a chronic reality for millions of people, including disproportionate numbers of the elderly and people of color. Many people, Otto reveals, resort to prayer to counteract the uniquely devastating effects of dental pain. Otto also goes back in time to understand the roots of our predicament in the history of dentistry, showing how it became separated from mainstream medicine, despite a century of growing evidence that oral health and general bodily health are closely related. Muckraking and paradigm-shifting, *Teeth* exposes for the first time the extent and meaning of our oral health crisis. It joins the small shelf of books that change the way we view society and ourselves—and will spark an urgent conversation about why our

teeth matter.

Treatment Planning in Dentistry - E-Book Stephen J. Stefanac 2006-08-29

This book provides essential knowledge for creating treatment plans for adult dental patients. Treatment planning strategies are presented to help with balancing the ideal with the practical, with emphasis placed on the central role of the patient – whose needs should drive the treatment planning process. The focus is on planning of treatment, not on the comprehensive details of every treatment modality in dentistry. CD-ROM bound into book presents five cases of varying difficulty with interactive exercises that allow users to plan treatment.

What's the Evidence? boxes link clinical decision-making and treatment planning strategies to current research. In Clinical Practice boxes highlight specific clinical situations faced by the general dentist. Review Questions and Suggested Projects, located at the end of each chapter, summarize and reinforce important concepts presented in the book. Key Terms and Glossary highlights the terms that are most important to the reader. Suggested Readings lists included at the end of most chapters provide supplemental resources. Chapter on Treatment Planning for Smokers and Patients with Oral Cancer addresses the dentist's role in managing patients with oral cancer, recognizing oral cancer and differential diagnosis of oral

lesions, planning treatment for patients undergoing cancer therapy, and smoking cessation strategies. Chapter on Treatment Planning for the Special Care/Special Needs Patient examines the role of the general dentist in the management of patients with a variety of conditions including physical handicaps, mental handicaps, head trauma, hemophilia, and patients' needs before, during, or after major surgery. Chapter on Treatment Planning for the Alcohol and Substance Abuser discusses the challenges of treating this patient population, as well as how to recognize the problem, delivery of care, scope of treatment, and behavioral/compliance issues. Expanded content on Ethical and Legal Issues in Treatment Planning reflects new accreditation guidelines. Dental

Team Focus boxes highlight the relevance of chapter content to the dental team. Ethics Topics boxes emphasize the ethical topics found within each chapter. International Tooth Numbering is listed alongside the U.S. tooth numbers in examples and illustrations.

14 Rules for Admissions Screening in Higher Ed Behrouz Moemeni 2019-09-02

Is it possible to create an admissions screening process that allows any educational institution to select top-performing applicants and simultaneously promote diversity? Is it possible to choose applicants genuinely motivated in the pursuit of a profession rather than those primarily focused on acquiring wealth or status? Is it possible to achieve all of the above, being fair to all

applicants and reducing the time and cost of the admissions screening process? Dr. Behrouz Moemeni, one of the most sought-after admissions expert and an outspoken advocate for fair and scientific admissions screening, believes the answer to all of the above questions is a resounding "YES". characteristics How to design questions that seek the truth from each applicant How to separate highly suitable applicants from the rest without any guess work or "gut feeling" How to design questions that promote diversity while being fair to applicants How to increase the reliability and validity of any admissions screening practice or tool How to democratize the admissions process and educational institutions Sample questions and answers for admissions teams And much more!

Business Basics for Dentists David O. Willis 2013-03-05 Dr. David Willis combines his experience as a practicing dentist, educator, MBA, and certified financial planner in this breakthrough text about managing a dental business. Rather than a checklist of steps for success,

Business Basics for Dentists describes business, economic, marketing, and management principles and explains how to apply them to the dental practice. Dental students and new practitioners will learn how to use the core strategic and operational business philosophies to develop an effective dental practice. He provides the essential elements of a business course--management principles, economics, business finance, and financial analysis--without bogged down in too much detail. These are then related specifically to various aspects of running and managing a dental practice, including office communications, billing, inventory, and marketing the practice. All aspects of practice transition are approached: career opportunities,

buying a practice, starting a new practice, multi-practitioner arrangements, practice valuation, and planning and developing a practice. Last, Willis included personal financial planning to ensure that the dentist is also planning for his own finances and retirement beyond the bounds of the practice.

Dentistry Interview Questions and Answers With Full Explanations (Includes Sections on Mmi and 2013 Nhs Changes) Sri H. Ravi 2013-09-30

The Dentistry interview book is the number one selling dentistry book worldwide, providing an up-to-date review of the most common questions, with full answers and pointers on what the interviewers are looking for. Described as the 'essential guide', it is a vital resource as

part of your preparation. Example question: Consider the case of nine year old Rebecca who comes in to surgery with her parents. This is her first dental visit. She has been kept awake with a painful tooth. Examination shows that she has several decayed teeth and that a lower right primary molar is causing the present pain. Rebecca is crying and climbing out of the dental chair. What is the best way to handle this situation. Clinically Rebecca's case draws on various themes. Without starting your undergraduate training you will not need to know about the clinical implications in detail. However, an understanding of the themes will make you stand out. A common answer is to indicate that some dentists may consider writing a brief referral letter to the local

hospital for this tooth to be extracted with a general anaesthetic. The questions that you want to be thinking about clinically are:

- Can this tooth be restored or does it need extraction?
- What are the implications if I extract in the future (orthodontically can it have consequences)?
- Does the patient need General Anaesthetic or can this be managed within practice under Local Anaesthetic.
- Rebecca has other dental needs as stated and has never attended a dentists before, how would I like to manage this to cause her the least upset?

All of the above would require consideration of who would be consenting for the patient. In this case at 9 years old, the patient would require a parent or legal guardian to consent for her. 'Gillick Competence' allows for a

child up to the age of eighteen to make their own decision regarding their care. However, the dentist must carefully assess that all the criteria for valid consent detailed in question four are present. There is particular emphasis placed on the patient's ability to understand and retain all the information given and communicate their reasoned decision. 'Gillick Competence' will be more relevant for scenarios where the child in question is slightly older. The ethical and legal responsibility to respect children as well as those who support them is essential in establishing strong professional relationships. In this particular situation explaining the options and offering choices will help the parents to make their decisions appropriately after understanding

what's on offer, which in turn will increase the likelihood of co-operation, whichever option is finally decided upon. For Example: "The dentist should tell the family about the options and explain how the pain can be controlled with analgesics and a simple dressing. He /she should explain that it may be wise to slowly introduce Rebecca to dental care so that she becomes familiar with the dental environment before starting treatment. In this way he is enforcing the act of beneficence by acting in the patient's best

interests and enabling the child's parents to make an informed decision- thereby enabling autonomy" Topics covered: GENERAL POINTS TO CONSIDER TRADITIONAL INTERVIEWS AND MMIS SCIENCE QUESTIONS ETHICAL QUESTIONS ABOUT THE UNIVERSITY PERSONAL QUALITIES ABOUT YOU WORK EXPERIENCE AND EDUCATION DENTAL & INDUSTRY DENTISTRY IN THE NHS CURRENT AFFAIRS Want to be tutored by the authors for your dentistry interview?
