Elasticity and Toughness Feng Wei 2021-12-31 This book examines minban teacher policies and their implementation in China between 1949 and 2000, when rural areas were in severe shortage of qualified teachers. During this period of time, minban teachers made great contributions to education, doing the same work as state-employed school teachers while receiving much lower salaries due to non-official status. With solid fieldwork on oral history of minban teachers and policy actors and deep examination of a wealth of policy documents in private and

governmental archives, the author records the life history of minban teachers, the process of minban teacher policies, and the interaction between policies and individual strategies in M county (pseudonym), located in northern Jiangsu province of China. The book reveals many interesting and sometimes surprising findings about the characteristics of educational policy implementation in China. While China's minban teacher policies have come to an end, rural education continues to be a major concern of policymakers and researchers alike. The book is an important piece of scholarship for the readers interested in rural education in China, and in how state, society, and culture interact to influence teacher policies and management in the Chinese context.

Paper Belt on Fire Michael Gibson

2022-10-25 Paper Belt on Fire is the unlikely account of how two outsiders with no experience in finance—a charter school principal and defrocked philosopher—start a venture capital fund to short the higher education bubble. Against the contempt of the education establishment, they discover, mentor, and back the leading lights in the next generation of dropout innovators and in the end make their investors millions. Can such a madcap strategy help renew American creativity? Who would do such a thing? This story is the behind-the-scenes romp of one team that threw educational authorities into a panic. It fuses real-life personal drama with history, science, and philosophy to show how higher education and other institutions must evolve to meet the dire challenges of tomorrow.
