Web4) Sum the geometrical progression of five terms of which the first term is 7 and the multiplier is 7.

Solutions at the end of this section.

I If you observe the world around you, you will notice that triangles are everywhere. This is particularly true of structures – buildings, bridges, towers – all are supported by triangles.

LAWS OF MOTION - National Council of Educational Research ...

Webearth. A bar magnet can attract an

iron nail from a distance. This shows that external agencies (e.g. gravitational and magnetic forces) can exert force on a body even from a distance. In short, a force is required to put a stationary body in motion or stop a moving body, and some external agency is needed to provide this force.
