The Role of Media Pluralism in the Enforcement of EU Competition Law

Konstantina Bania 2019-03 In an era of communicative abundance, consumers can access content anytime, anywhere and on any digital device. Safeguarding media pluralism has never before been as essential to our democracies as it is today. What role, if any, should EU competition law then play in protecting it? In delving into this question, Konstantina Bania conducts an in-depth analysis of the economics of the sector as well as the Commission's decision-making practice regarding mergers, abuses of dominance as well as anti-competitive agreements. Combining unique theoretical and practical insights, this book showcases novel tools for competition law enforcement to protect quality dimensions of competition and consumer welfare in media markets where consumers increasingly pay with their attention or data rather than money. This book is a must-read study for all scholars, competition authorities and policymakers interested in the question of how competition law can apply in such a manner that antitrust and merger assessments do not disregard non-price concerns such as privacy or diversity.

Strategic Innovative Marketing and Tourism Androniki Kavoura 2019-07-03

This book covers a very broad range of topics in marketing, communication, and tourism, focusing especially on new perspectives and technologies that promise to influence the future direction of marketing research and practice in a digital and innovational era. Among the areas covered are product and brand management, strategic marketing, B2B marketing and sales management, international marketing, business communication and advertising, digital and social marketing, tourism and hospitality marketing and management, destination branding and cultural management, and event marketing. The book comprises the proceedings of the International Conference on Strategic Innovative Marketing and Tourism (ICSIMAT) 2018, where researchers, academics, and government and industry practitioners from around the world came together to discuss best practices, the latest research, new paradigms, and advances in theory. It will be of interest to a wide audience, including members of the academic community, MSc and PhD students, and marketing and tourism professionals.

Subprime Attention Crisis Tim Hwang 2020-10-13 From FSGO x Logic: a revealing examination of digital advertising and the internet's precarious foundation In *Subprime Attention Crisis*, Tim Hwang investigates the way big tech financializes attention. In the process, he shows us how digital advertising—the beating heart of the internet—is at risk of collapsing, and that its potential demise bears an uncanny resemblance to the housing crisis of 2008. From the unreliability of advertising numbers and the unregulated automation of advertising bidding wars, to the simple fact that online ads mostly fail to work, Hwang demonstrates that while consumers' attention has never been more prized, the true value of that attention itself—much like subprime mortgages—is wildly misrepresented. And if online advertising goes belly-up, the internet—and its free services—will suddenly be accessible only to those who can afford it. Deeply researched, convincing, and alarming, *Subprime Attention Crisis* will change the way you look at the internet, and its precarious future. FSG Originals × Logic dissects the way technology functions in everyday lives. The titans of Silicon Valley, for all their utopian imaginings, never really had our best interests at heart: recent threats to

democracy, truth, privacy, and safety, as a result of tech's reckless pursuit of progress, have shown as much. We present an alternate story, one that delights in capturing technology in all its contradictions and innovation, across borders and socioeconomic divisions, from history through the future, beyond platitudes and PR hype, and past doom and gloom. Our collaboration features four brief but provocative forays into the tech industry's many worlds, and aspires to incite fresh conversations about technology focused on nuanced and accessible explorations of the emerging tools that reorganize and redefine life today.

Marketing Strategy Jenna Tiffany 2021-05-03 Tasked with creating marketing strategy? This book is for you. Learn about the most useful tools and models, dodge common mistakes, and optimize your marketing strategy success, with this practical and adaptable framework from award-winning thought-leader Jenna Tiffany. Create an effective marketing strategy for your business with *Marketing Strategy*, which offers a clear, easy-to-follow overview of why strategy is important, how to create it, how to implement it, and - crucially - how to measure its success. Packed with global examples and case studies, the book opens by discussing the role strategy plays in any organization's long-term vision. It also discusses the key models and frameworks that can be used to analyze the marketing environment, and offers information on segmentation, targeting and positioning. Importantly, it will outline some of the key challenges likely to crop up, and gives pre-emptive tools for avoiding them. *Marketing Strategy* is highly practical in approach. Chapters are supported by short tasks to complete throughout, to cement the reader's understanding of the concepts discussed. Put together, these tasks create an easy to follow, step-by-step framework for creating a marketing strategy. The framework is adaptable and can be applied to any industry or business. *Marketing Strategy* also includes input from leading

marketing strategists including Mark Ritson, organizations such as Mailchimp, the CIM and DMA.

Machines Behaving Badly Toby Walsh 2022-05-03 Artificial intelligence is an essential part of our lives – for better or worse. It can be used to influence what we buy, who gets shortlisted for a job and even how we vote. Without AI, medical technology wouldn't have come so far, we'd still be getting lost on backroads in our GPS-free cars, and smartphones wouldn't be so, well, smart. But as we continue to build more intelligent and autonomous machines, what impact will this have on humanity and the planet? Professor Toby Walsh, a world-leading researcher in the field of artificial intelligence, explores the ethical considerations and unexpected consequences AI poses – Is Alexa racist? Can robots have rights? What happens if a self-driving car kills someone? What limitations should we put on the use of facial recognition? *Machines Behaving Badly* is a thought-provoking look at the increasing human reliance on robotics and the decisions that need to be made now to ensure the future of AI is as a force for good, not evil.

Digital and Social Media Marketing Nripendra P. Rana 2019-11-11 This book examines issues and implications of digital and social media marketing for emerging markets. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. The book investigates problems specific to emerging markets, while identifying new theoretical constructs and practical applications of digital marketing. It addresses topics such as electronic word of mouth (eWOM), demographic differences in digital marketing, mobile marketing, search engine advertising, among others. A radical increase in both temporal and geographical reach is

empowering consumers to exert influence on brands, products, and services. Information and Communication Technologies (ICTs) and digital media are having a significant impact on the way people communicate and fulfil their socio-economic, emotional and material needs. These technologies are also being harnessed by businesses for various purposes including distribution and selling of goods, retailing of consumer services, customer relationship management, and influencing consumer behaviour by employing digital marketing practices. This book considers this, as it examines the practice and research related to digital and social media marketing.

Devour the Land Makeda Best 2021-09-28 Tracing the impacts of militarism on the American landscape, through the lens of art, environmental studies, and politics *Devour the Land* considers how contemporary photographers have responded to the US military's impact on the domestic environment since the 1970s, a dynamic period for environmental activism as well as for photography. This catalogue presents a lively range of voices at the intersection of art, environmentalism, militarism, photography, and politics. Alongside interviews with prominent contemporary artists working in the landscape photography tradition, the images speak to photographers' varied motivations, personal experiences, and artistic approaches. The result is a surprising picture of the ways violence and warfare surround us. Although most modern combat has taken place abroad, the US domestic landscape bears the footprint of armed conflict--much of the environmental damage we live with today was caused by our own military and the expansive network of industries supporting its work. Designed to evoke a field book and to nod toward ephemera produced by earlier artists and activists, the catalogue features works by dozens of photographers, including Ansel Adams, Robert Adams, Dorothy Marder, Alex Webb, Terry Evans, and many more.

EU Competition Law, Data Protection and Online Platforms: Data as Essential Facility Inge Graef 2016-10-17 All are agreed that the digital economy contributes to a dynamic evolution of markets and competition. Nonetheless, concerns are increasingly raised about the market dominance of a few key players. Because these companies hold the power to drive rivals out of business, regulators have begun to seek scope for competition enforcement in cases where companies claim that withholding data is needed to satisfy customers and cut costs. This book is the first focus on how competition law enforcement tools can be applied to refusals of dominant firms to give access data on online platforms such as search engines, social networks, and e-commerce platforms – commonly referred to as the ‘gatekeepers’ of the Internet. The question arises whether the denial of a dominant firm to grant competitors access to its data could constitute a ‘refusal to deal’ and lead to competition law liability under the so-called ‘essential facilities doctrine’, according to which firms need access to shared knowledge in order to be able to compete. A possible duty to share data with rivals also brings to the forefront the interaction of competition law with data protection legislation considering that the required information may include personal data of individuals. Building on the refusal to deal concept, and using a multidisciplinary approach, the analysis covers such issues and topics as the following: – data portability; – interoperability; – data as a competitive advantage or entry barrier in digital markets; – market definition and dominance with respect to data; – disruptive versus sustaining innovation; – role of intellectual property regimes; – economic trade-off in essential facilities

cases; – relationship of competition enforcement with data protection law and – data-related competition concerns in merger cases. The author draws on a wealth of relevant material, including EU and US decision-making practice, case law, and policy documents, as well as economic and empirical literature on the link between competition and innovation. The book concludes with a proposed framework for the application of the essential facilities doctrine to potential forms of abuse of dominance relating to data. In addition, it makes suggestions as to how data protection interests can be integrated into competition policy. An invaluable contribution to ongoing academic and policy discussions about how data-related competition concerns should be addressed under competition law, the analysis clearly demonstrates how existing competition tools for market definition and assessment of dominance can be applied to online platforms. It will be of immeasurable value to the many jurists, business persons, and academics concerned with this very timely subject.

Tourism Marketing Alastair M. Morrison 2022-03-30 *Tourism Marketing: In the Age of the Consumer* offers a fresh and contemporary approach as an introductory textbook on tourism marketing. Six major themes along with the traditional core marketing principles are blended together: Age of the consumer: This book places the customer at the heart of tourism marketing and not the sector's promotional apparatus. Experiences: It highlights the growing consumer interest in the enjoyment of experiences and experiential marketing. New media: Social media and e-marketing are given emphasis throughout. Coverage of new media is present in all chapters. Global marketplace: Every chapter adopts a global outlook and offers international perspectives. Environment and social responsibility: An emphasis is placed on

the sustainability of tourism, including the concepts of ethical tourism and social responsibility. Events: This book treats events as a major tourism marketing topic and integrates events within the concept of experiential marketing. Written in an engaging and accessible style, *Tourism Marketing: In the Age of the Consumer* is richly illustrated and full of actual case studies and examples looking at a wide variety of topics such as slum tourism, the sharing economy, staycations, event bidding, coping with COVID-19, air travel emissions and many more. Four features add interest and bring greater pedagogical value – Quick Bytes, Case Studies, Industry Voices and Vignettes. This will be essential reading for all tourism marketing students.

Entrepreneurship in Tourism Andreas Walmsley 2018-11-19 The development of tourism has historically been characterised by enterprising individuals. Small businesses are the backbone of the tourism and hospitality industry. However, entrepreneurship and the entrepreneurial process have long been marginal topics within tourism scholarship. This is a critical, yet accessible, introduction to the subject. Structured into twelve chapters, this book takes an intuitive step-by-step progression through entrepreneurship in tourism: context, theoretical perspectives and definitions; the entrepreneurial process from concept to reality to growth, policy context and future directions. Featuring learning outcomes, 'reflective practice' activities and a range of international case studies that encourage critical thinking and practical applications, this is essential reading for anyone studying tourism degree programmes at undergraduate and graduate level.

Digitization of Economy and Society Sudeshna Basu Mukherjee 2021-10-21

This new volume looks at a selection of important issues resulting from the digitization of society, which has fundamentally transformed organizations. These new technological innovations are creating new opportunities as well as new challenges. This volume considers the emerging paradigm of digitization in economy and society, which covers a wide spectrum of digitization processes and consequences, accelerated by the current COVID-19 pandemic, the lockdown scenario, and the increase in digitization by individuals, businesses, and governments. The book explores digital social trends, digital marketing, and the service industry, as well as the societal consequences of technologies and solutions to those problems. The diverse topics include the societal impact of digitization on gender issues, virtual relationships, e-government, online privacy, the gig economy (using Uber as an example), work life changes, online education, online media health public service advertisements, loneliness of the elderly, and more. This book is essential reading for students and faculty of social sciences, economics, and management technology to understand the broad dimensions of digitization in our everyday life and the theoretical and practical utilization and outcome of digitization.

Virtual Competition Ariel Ezrachi 2016-11-30 Ariel Ezrachi and Maurice Stucke take a hard look at today's app-assisted paradise of digital shopping. The algorithms and data-crunching that make online purchasing so convenient are also changing the nature of the market by shifting power into the hands of the few, with risks to competition, our democratic ideals, and our overall well-being.

The Future of the Office Peter Cappelli 2021-08-10 The COVID-19 pandemic forced an unprecedented experiment that reshaped white-collar work and turned remote work into a kind of "new normal." Now comes the hard part. Many employees want to continue that normal and keep working remotely, and most at least want the ability to work occasionally from home. But for employers, the benefits of employees working from home or hybrid approaches are not so obvious. What should both groups do? In a prescient new book, *The Future of the Office: Work from Home, Remote Work, and*

the Hard Choices We All Face, Wharton professor Peter Cappelli lays out the facts in an effort to provide both employees and employers with a vision of their futures. Cappelli unveils the surprising tradeoffs both may have to accept to get what they want. Cappelli illustrates the challenges we face by in drawing lessons from the pandemic and deciding what to do moving forward. Do we allow some workers to be permanently remote? Do we let others choose when to work from home? Do we get rid of their offices? What else has to change, depending on the approach we choose? His research reveals there is no consensus among business leaders. Even the most high-profile and forward-thinking companies are taking divergent approaches: --Facebook, Twitter, and other tech companies say many employees can work remotely on a permanent basis. --Goldman Sachs, JP Morgan, and others say it is important for everyone to come back to the office. --Ford is redoing its office space so that most employees can work from home at least part of the time, and --GM is planning to let local managers work out arrangements on an ad-hoc basis. As Cappelli examines, earlier research on other types of remote work, including telecommuting offers some guidance as to what to expect when some people will be in the office and others work at home, and also what happened when employers tried to take back offices. Neither worked as expected. In a call to action for both employers and employees, Cappelli explores how we should think about the choices going forward as well as who wins and who loses. As he implores, we have to choose soon.

Guide to the GDPR Maciej Gawronski 2019-07-17 To execute and guarantee the right to privacy and data protection within the European Union (EU), the EU found it necessary to establish a stable, consistent framework for personal data protection and to enforce it in a decisive manner. This book, the most comprehensive guide available to the General Data Protection Regulation (GDPR), is the first English edition, updated and expanded, of a bestselling book published in Poland in 2018 by a renowned technology lawyer, expert to the European Commission on cloud computing and to the Article 29 Working Party (now: the European Data Protection Board) on data transfers who in fact contributed ideas to the GDPR. The implications of major innovations of the new system – including the obligation of businesses to consult the GDPR first rather than relevant Member State legislation and the extension of the GDPR to companies located outside of the European Economic Area – are fully analysed for the benefit of lawyers and companies

worldwide. Among the specific issues and topics covered are the following: insight into the tricky nature of the GDPR; rules relating to free movement of personal data; legal remedies, liability, administrative sanctions; how to prove compliance with GDPR; direct liability of subcontractors (sub-processors); managing incidents and reporting data breaches; information on when and under what conditions the GDPR rules may apply to non-EU parties; backups and encryption; how to assess risk and adjust security accordingly and document the process; guidelines of the European Data

Protection Board; and the GDPR's digest for obligated parties in a form of a draft data protection policy. The Guide often breaks down GDPR articles into checklists of specific requirements. Of special value are the numerous ready-to-adapt template compliance documents presented in Part II. Because the GDPR contains a set of new obligations and a perspective of severe administrative fines for non-compliance, this guide is an indispensable practical resource for corporate data protection officers, in-house counsel, lawyers in data protection practice, and e-commerce start-ups worldwide.
