Microfinance investments : an investor's guide to financing the growth and wealth creation of small enterprises and low income households in emerging economies Roland Dominicé 2012 "This book offers investors an in-depth guide to understanding the microfinance investment value chain and its

benefits. It aims to increase the awareness of this growing asset class among traditional investors by providing a detailed review of the current state of the industry. The book focuses on the two key intermediaries linking investors and small enterprises: financial institutions and investment funds, covering their respective markets, models, risks, performance and impact. By describing their dynamics, strengths and weaknesses, it helps the investor to better grasp the elements of choice when deciding to add microfinance in his portfolio."--Preface.

The Fingerprint U.s. Department of Justice 2014-08-02 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

The context of natural forest management and FSC certification in Brazil Claudia Romero 2015-12-30 Management decisions on appropriate practices and policies regarding tropical forests often need to be made in spite of innumerable uncertainties and complexities. Among the uncertainties are the lack of formalization of lessons learned regarding the impacts of previous programs and projects. Beyond the challenges of generating the proper information on these impacts, there are other difficulties that relate with how to socialize the information and knowledge gained so that change is transformational and

enduring. The main complexities lie in understanding the interactions of social-ecological systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to develop an independent evaluation of certification impacts with stakeholder input, which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base of the empirical biophysical, social, economic, and policy effects that FSC certification of natural forest has had in Brazil as well as in other tropical countries. The contents of this volume highlight the opportunities and constraints that those responsible for managing natural forests for timber production have experienced in their efforts to improve their practices in Brazil. As such, the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals.

The Philosophy of Psychology George Botterill 1999-08-19 What is the relationship between common-sense, or 'folk', psychology and contemporary scientific psychology? Are they in conflict with one another? Or do they perform quite different, though perhaps complementary, roles? George Botterill and Peter Carruthers discuss these questions, defending a robust form of realism about the commitments of folk psychology and about the prospects for integrating those commitments into natural science. Their focus throughout the book is on the ways in which cognitive science presents a challenge to our common-sense self-image - arguing that our native conception of the mind will be enriched, but not overturned, by science. The Philosophy of Psychology is designed as a textbook for upper-level undergraduate and beginning graduate students in philosophy and cognitive science, but as a text that not only surveys but advances the debates on the topics discussed, it will also be of interest to researchers working in these areas.

Timberland Investments F. Christian Zinkhan 1992 Common stock. Corporate bonds. Stock mutual funds. Call and put options. Commercial and residential real estate. Municipal bonds. These and others are the alternatives many individual and institutional investors consider when constructing their investment portfolios. This is the first book to investigate how another investment alternative--timberland--can fit into the portfolios of individuals and such institutions as pension funds. Timberland supplies the basic raw material for a critical global industry--forest products. Timber can be managed economically as a renewable crop on hundreds of millions of acres in the United States. Given the forces supporting conservation of forests in their natural state on many public and some private lands in the United States and other nations, there is increasing pressure on the remaining privately owned forests to supply the needed timber output. This represents an opportunity for patient, long-term investors. Using insights and graphic examples supplied by experienced institutional investors, professional foresters, forestry and financial researchers, and others, the authors address such questions as the following: How do timberland's investment characteristics compare to those associated with other portfolio alternatives? In addition to direct investments in forests, in what other ways can investors participate in the timberland market? Can the addition of timberland to some investors' diversified portfolios improve overall performance? What personal financial planning goals can be served by timberland? What acquisition, forest management, and sale

strategies can be adopted by individual and institutional investors so that objectives are better achieved? In the course of addressing such questions, the authors attempt to bridge the communications gap between the investment and forestry communities. The authors provide valuable perspectives not only for individual and institutional investors, but also for personal financial advisors; forestry practitioners, policymakers and researchers; and students of forestry, real estate, and investments.

Dust Control Handbook for Industrial Minerals Mining and Processing Andrew B. Andrew B. Cecala 2015-05-09 Throughout the mining and processing of minerals, the mined ore undergoes a number of crushing, grinding, cleaning, drying, and product sizing operations as it is processed into a marketable commodity. These operations are highly mechanized, and both individually and collectively these processes can generate large amounts of dust. If control technologies are inadequate, hazardous levels of respirable dust may be liberated into the work environment, potentially exposing workers. Accordingly, federal regulations are in place to limit the respirable dust exposure of mine workers. Engineering controls are implemented in mining operations in an effort to reduce dust generation and limit worker exposure.

The Little Book of Restorative Justice Howard Zehr 2015-01-27 Howard Zehr is the father of Restorative Justice and is known worldwide for his pioneering work in transforming understandings of justice. Here he proposes workable principles and practices for making Restorative Justice possible in this revised and updated edition of his bestselling, seminal book on the movement. (The original edition has sold more than 110,000 copies.) Restorative Justice, with its emphasis on identifying the justice needs of everyone involved in a crime, is a worldwide movement of growing influence that is helping victims and communities heal, while holding criminals accountable for their actions. This is not soft-on-crime, feel-good philosophy, but rather a concrete effort to bring justice and healing to everyone involved in a crime. In *The Little Book of Restorative Justice*, Zehr first explores how restorative justice is different from criminal justice. Then, before letting those appealing observations drift out of reach into theoretical space, Zehr presents Restorative Justice practices. Zehr undertakes a massive and complex subject and puts it in graspable form, without reducing or trivializing it. This resource is also suitable for academic classes and workshops, for conferences and trainings, as well as for the layperson interested in understanding this innovative and influential movement.

Differential and Integral Calculus Richard Courant 2011-08-15 The classic introduction to the fundamentals of calculus Richard Courant's classic text *Differential and Integral Calculus* is an essential text for those preparing for a career in physics or applied math. Volume 1 introduces the foundational concepts of "function" and "limit", and offers detailed explanations that illustrate the "why" as well as the "how". Comprehensive coverage of the basics of integrals and differentials includes their applications as well as clearly-defined techniques and essential theorems. Multiple appendices provide supplementary

explanation and author notes, as well as solutions and hints for all in-text problems.

What Expert Teachers Do John Loughran 2012-07-26 How do expert teachers do it? How do they enhance student learning? How do they manage the dilemmas and tensions inherent in working with 25 different students in every lesson? Internationally respected teacher educator John Loughran argues that teachers' knowledge of what they do is largely tacit and often misunderstood. In this book, he distils the essence of professional practice for classroom teachers. Drawing on the best research on pedagogy, he outlines the crucial principles of teaching and learning, and shows how they are translated into practice using real classroom examples. He emphasises that teaching procedures need to be part of an integrated approach, so that they are genuinely meaningful and result in learning. Throughout, he shows how teachers can engage their students in ways that create a real 'need to know', and a desire to become active learners. *What Expert Teachers Do* is for teachers who want to become really accomplished practitioners.

The Constitution of India B. Ambedkar 2019-06-06 The Constitution of India is the supreme law of land. The document lays down extensively the framework demarcating fundamental political code, structure, procedures, powers, and duties of government institutions and sets out fundamental rights, directive principles, and the duties of citizens. It is the longest written constitution of any country on earth. B. R. Ambedkar, chairman of the drafting committee, is widely considered to be its chief architect. Constitution is a living document, an instrument which makes the government system work. Its flexibility lies in its amendments. In this edition, the text of the Constitution of India has been brought up-to-date by incorporating therein all amendments made by Parliament up to and including the Constitution (One Hundredth Amendment) Act, 2015 which contains details of acquired and transferred territories between the Governments of India and Bangladesh and the same has been included in Annexure.
