Guide to Psychological Assessment with Asians Lorraine T. Benuto 2014-06-26 To effectively serve minority clients, clinicians require a double understanding: of both evidence-based practice and the cultures involved. This particularly holds true when working with Asian-Americans, a diverse and growing population. The Guide to Psychological Assessment with Asians synthesizes real-world challenges, empirical findings, clinical knowledge and common-sense advice to create a comprehensive framework for practice. This informed resource is geared toward evaluation of first-generation Asian Americans and recent immigrants across assessment methods (self-report measures, projective tests), settings (school, forensic) and classes of disorders (eating, substance, sexual). While the Guide details cross-cultural considerations for working with Chinese-, Japanese-, Korean and Indian-American clients, best practices are also included for assessing members of less populous groups without underestimating, overstating or stereotyping the role of ethnicity in the findings. In addition, contributors discuss diversity of presentation within groups and identify ways that language may present obstacles to accurate evaluation. Among the areas covered in this up-to-date reference: Structured and semi-structured clinical interviews. Assessment of acculturation, enculturation and culture. IQ testing. Personality disorders. Cognitive decline and dementia. Mood disorders and suicidality. Neuropsychological assessment of children, adolescents and adults. Culture-bound syndromes. Designed for practitioners new to

working with Asian clients as well as those familiar with the population, the Guide to Psychological Assessment with Asians is exceedingly useful to neuropsychologists, clinical psychologists, health psychologists and clinical social workers.

Ikonica Jeanette Hanna 2008 "Ikonica is the first exploration of Canada's rich and unique brand heritage. Authors Jeannette Hanna and Alan Middleton shed light on the evolution of our country's best-known brands, from the Hudson's Bay Company to Canadian Tire. The visual tour of Canada's branding environment highlights the prime movers, the triumphs and the failures." "Both Hanna and Middleton draw on years of experience as brand strategists to offer an inside look at the major players in Canadian branding, from global success stories like Cirque du Soleil to domestic upstarts like Westjet. The heart of the books is almost thirty interview with a "who's who" of major business and cultural figures including Paul House (Tim Hortons), Robert Milton (Air Canada), Fred Schaeffer (McCain Foods), and William Thorsell (Royal Ontario Museum). The

authors' provocative analysis shows what it takes for Canadian brands to punch above their weight in the global marketplace."--BOOK JACKET.

The Canadian Experience of the Great War

Brian Douglas Tennyson 2013-05-01 Although the United States itself did not enter the war until April 1917, Canada enlisted the moment Great Britain engaged in the conflict in August of 1914. The Canadian contribution was great, as over 600,000 men and women came to serve in the war effort. Over 150,000 were wounded while near 67,000 gave their lives. The literature it generated, and continues to generate so many years later, is enormous and addresses all of its aspects. *The Canadian Experience of the Great War: A Guide to Memoirs* is the first attempt to identify all of the published accounts by Canadian veterans of their Great War experiences.

A Guide to Treatments That Work Peter E. Nathan 2015-06-26 Like its predecessors, this fourth edition of *A Guide to Treatments That Work* offers detailed chapters that review the latest research on pharmacological and psychosocial treatments that work for the full range of psychiatric and psychological disorders, written in most instances by clinical psychologists and psychiatrists who have been major contributors to that literature. Similarly, the standards by which the authors were asked to evaluate the methodological rigor of the research on treatments have also remained the same. Each chapter in *A Guide to Treatments That Work* follows the same general outline: a review of diagnostic cues to the

disorder, a discussion of changes in the nomenclatures from DSM-IV to DSM-5, and then a systematic review of research, most of which has been reported within the last few years, that represents the evidence base for the treatments reviewed. In all, 26 of the volume's 28 chapters review the evidence base for 17 major syndromes. Featuring this coverage is a *Summary of Treatments that Work*, an extended matrix offering a ready reference by syndrome of the conclusions reached by the chapter authors on treatments that work reviewed in their chapters. New to this edition are two chapters at the beginning of the book. Chapter 1 details two perplexing issues raised by critics of DSM-5: the unrealized potential of neuroscience biomarkers to yield more accurate and reliable diagnoses and the lingering problem of conflicts of interest in pharmaceutical research. Chapter 2 contrasts Native American and western ways of identifying effective treatments for mental and physical disorders, concluding that "evidence-informed culture-based" interventions sometimes constitute best practices in Native communities. Two chapters detailing pharmacological treatments for pediatric bipolar disorder (Chapter 9) and pediatric depressive disorder (Chapter 12) have also been added. More than three quarters of the chapters are written by colleagues who also contributed to most or all of the previous editions. Hence, this new edition provides up-to-date information on the quality of research on treatment efficacy and effectiveness provided by individuals who know the research best.
