Blossoms of the Savannah Henry R. ole Kulet 2008 Blossoms of the Savannah is the story of two sisters, Taiyo and Resian, who are on the verge of womanhood and torn between their personal ambitions and the humiliating duty to the Nasila tradition. Relocation to their rural home heralds a cultural alienation born of their refusal to succumb to female genital mutilation and early marriages. In pursuit of the delicate and elusive socio-economic cultural balance in Nasila, Ole. Kaelo, the girls' father is ensnared by a corrupt extortionist. To extricate himself he sends his daughters into a flat-spin labyrinth from which they have to struggle to escape.

Digital Kenya Bitange Ndemo 2016-11-18 This book is open access under a CC BY 4.0 license. Presenting rigorous and original research, this volume offers key insights into the historical, cultural, social, economic and political forces at play in the creation of world-class ICT innovations in Kenya. Following the arrival of fiber-optic cables in 2009, Digital Kenya examines why the initial entrepreneurial spirit and digital revolution has begun to falter despite support from motivated entrepreneurs, international investors, policy experts and others. Written by engaged scholars and professionals in the field, the book offers 15 eye-opening chapters and 14 one-on-one conversations with entrepreneurs and investors to ask why establishing ICT start-ups on a continental and global scale remains a challenge on the "Silicon Savannah". The authors present evidence-based recommendations to help Kenya to continue producing globally impactful ICT innovations that improve the lives of those still waiting on the side-lines, and to inspire other nations to do the same.

The Weary Blues Langston Hughes 2022-01-24 Immediately celebrated as a tour de force upon its release, Langston Hughes's first published collection of poems still offers a powerful reflection of the Black experience. From "The Weary Blues" to "Dream Variation," Hughes writes clearly and colorfully, and his words remain prophetic.

A Man of the People Chinua Achebe 2016-09-30 From the renowned author of The African Trilogy, a political satire about an unnamed African country navigating a path between violence and corruption As Minister for Culture, former school teacher M. A. Nanga is a man of the people, as cynical as he is charming, and a roguish opportunist. When Odili, an idealistic young teacher, visits his former instructor at the ministry, the division between them is vast. But in the eat-and-let-eat atmosphere, Odili's idealism soon collides with his lusts—and the two men's personal and political tauntings threaten to send their country into chaos. When Odili launches a vicious campaign against his former mentor for the same seat in an election, their mutual animosity drives the country to revolution. Published, prophetically, just days before Nigeria's first attempted coup in 1966, A Man of the People is an essential part of Achebe's body of work.

There Was a Country Chinua Achebe 2012-10-11 From the legendary author of Things Fall Apart comes a long-awaited memoir about coming of age with a fragile new nation, then watching it torn asunder in a tragic civil war The defining experience of Chinua Achebe's life was the Nigerian civil war, also known as the Biafran War, of 1967–1970. The conflict was infamous for its savage

impact on the Biafran people, Chinua Achebe's people, many of whom were starved to death after the Nigerian government blockaded their borders. By then, Chinua Achebe was already a world-renowned novelist, with a young family to protect. He took the Biafran side in the conflict and served his government as a roving cultural ambassador, from which vantage he absorbed the war's full horror. Immediately after, Achebe took refuge in an academic post in the United States, and for more than forty years he has maintained a considered silence on the events of those terrible years, addressing them only obliquely through his poetry. Now, decades in the making, comes a towering reckoning with one of modern Africa's most fateful events, from a writer whose words and courage have left an enduring stamp on world literature. Achebe masterfully relates his experience, both as he lived it and how he has come to understand it. He begins his story with Nigeria's birth pangs and the story of his own upbringing as a man and as a writer so that we might come to understand the country's promise, which turned to horror when the hot winds of hatred began to stir. To read There Was a Country is to be powerfully reminded that artists have a particular obligation, especially during a time of war. All writers, Achebe argues, should be committed writers—they should speak for their history, their beliefs, and their people. Marrying history and memoir, poetry and prose, There Was a Country is a distillation of vivid firsthand observation and forty years of research and reflection. Wise, humane, and authoritative, it will stand as definitive and reinforce Achebe's place as one of the most vital literary and moral voices of our age.

Politics and Governance of Basic Education Brian Levy 2018-09-21 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world, economic inclusion has risen to the top of the development discourse. A well-performing education system is central to achieving inclusive development - but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased, but quality remains low, with weaknesses in governance comprising an important part of the explanation. The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process, combining practical steps to achieve incremental gains to re-orient the system towards learning.

Working with the Grain Brian Levy 2014-08-28 The development discourse has long been dominated by best practices prescriptions for reform, but these are not a useful way of responding to the governance ambiguities of the early 21st century. *Working with the Grain* draws on both innovative scholarship and Brian Levy's quarter century of experience at the World Bank to lay out an alternative-a practical, analytically grounded, "with-the-grain" approach to reducing poverty and addressing weaknesses in governance. Best practice prescriptions confuse the goals of development with the journey of getting from here to there. A strong rule of law, capable and accountable governments, and a flexible, level playing field business environment are indeed desirable end points. But the ability to describe well-governed states does not conjure them into existence. If the only available actions are all or nothing, then efforts at change will almost certainly fall short, leading to disillusion and despair. By contrast, this book takes as its point of departure the realities of a country's economy, polity and society, and directs attention towards the challenges of initiating and sustaining forward development momentum. The book: -- distinguishes among four broad groups of countries, according to whether polities are dominant or competitive, and whether institutions are personalized or impersonal -- identifies alternative options for governance and policy reform-top down options which endeavor to strengthen formal institutions, and options supporting the emergence of "islands of effectiveness" -- explores how to identify entry points for change where there is a good fit between divergent country contexts and alternative options for reform. Sometimes the binding constraint to forward movement can be institutional, making governance reform the priority; at other times, the priority can better be on inclusive growth. Taking the decade-or-so time horizon of practitioners, the aim is to nudge things along-seeking gains that initially may seem quite modest but sometimes can give rise to a cascading sequence of change for the better.

Radical Hope Kevin M. Gannon 2020-04 Higher education has seen better days. Harsh budget cuts, the precarious nature of employment in college teaching, and political hostility to the entire enterprise of education have made for an increasingly fraught landscape. *Radical Hope* is an ambitious response to this state of affairs, at once political and practical--the work of an activist, teacher, and public intellectual grappling with some of the most pressing topics at the intersection of higher education and social justice. Kevin Gannon asks that the contemporary university's manifold problems be approached as opportunities for critical engagement, arguing that, when done effectively, teaching is by definition emancipatory and hopeful. Considering individual

pedagogical practice, the students who are the primary audience and beneficiaries of teaching, and the institutions and systems within which teaching occurs, *Radical Hope* surveys the field, tackling everything from impostor syndrome to cell phones in class to allegations of a campus "free speech crisis." Throughout, Gannon translates ideals into tangible strategies and practices (including key takeaways at the conclusion of each chapter), with the goal of reclaiming teachers' essential role in the discourse of higher education.

The Souls of Black Folk W. E. B. Du Bois 2020-01-14 *The Souls of Black Folk* is a 1903 work of American literature by W. E. B. Du Bois. It is a seminal work in the history of sociology and a cornerstone of African-American literature. The book contains several essays on race, some of which the magazine *Atlantic Monthly* had previously published. To develop this work, Du Bois drew from his own experiences as an African American in American society. Outside of its notable relevance in African-American history, *The Souls of Black Folk* also holds an important place in social science as one of the early works in the field of sociology. In *The Souls of Black Folk*, Du Bois used the term "double consciousness", perhaps taken from Ralph Waldo Emerson ("The Transcendentalist" and "Fate"), applying it to the idea that black people must have two fields of vision at all times. They must be conscious of how they view themselves, as well as being conscious of how the world views them.

Betrayal in the City F. D. Imbuga 1987 *Betrayal in the City*, first published in 1976 and 1977, was Kenya's national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Mosese, one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future."--Page 4 of cover

Aspects of Teaching Secondary Science Sandra Amos 2003-09-02 This book's structure reflects

the different dimensions to learning science. The first section focuses on the importance of talk in the science classroom, while the second explores the key role of practical work. The third section is concerned with the creative, theoretical aspect of science. Section four follows this by considering the communication of ideas and how pupils learn to participate in the discourse of the scientific community. Section five emphasizes the place of science in the broader context, considering its moral and ethical dimensions and its place in a cultural context. Finally, section six explores the complexity of the task faced by science teachers, highlighting the knowledge and skills science teachers must acquire in order to create an environment in which students are motivated to learn science.

Kenya Charles Hornsby 2013-03-01 Since independence from Great Britain in 1963, Kenya has survived five decades as a functioning nation-state, holding regular elections; its borders and political system intact and avoiding open war with its neighbours and military rule internally. It has been a favoured site for Western aid, trade, investment and tourism and has remained a close security partner for Western governments. However, Kenya's successive governments have failed to achieve adequate living conditions for most of its citizens; violence, corruption and tribalism have been ever-present, and its politics have failed to transcend its history. The decisions of the early years of independence and the acts of its leaders in the decades since have changed the country's path in unpredictable ways, but key themes of conflicts remain: over land, money, power, economic policy, national autonomy and the distribution of resources between classes and communities. While the country's political institutions have remained stable, the nation has changed, its population increasing nearly five-fold in five decades. But the economic and political elite's struggle for state resources and the exploitation of ethnicity for political purposes still threaten the country's existence. Today, Kenyans are arguing over many of the issues that divided them 50 years ago. The new constitution promulgated in 2010 provides an opportunity for national renewal, but it must confront a heavy legacy of history. This book reveals that history.

Building the Nation and Other Poems Christopher Henry Muwanga Barlow 2000 Crafted with rare wit and humour, the poems in this book deal with a diverse range of themes such as political opportunism and sycophancy, war, the baffling paradox of god, the enchanting richness and

beauty of nature, and the fascinating yet sadly agonising and intractable nature of love. Spanning decades of experience and deep reflection by a veteran poet, this collection offers fresh and enriching insights into subjects that are of interest and concern to us all.

Millionaire by Thirty Douglas R. Andrew 2008-04-30 Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

Introduction to Radar Using Python and MATLAB Lee Andrew (Andy) Harrison 2019-10-31 This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.
