The unique clinical approach goes beyond a mere technical description of the various pieces of equipment to help readers identify equipment, understand how it works, and apply this information in clinical practice. Ventilators are organized by application area rather than by manufacturer, making the book even more clinically useful. The Physiology of Sleep chapter (Chapter 15) discusses polysomnography and the effect of sleep and sleep disorders on cardiopulmonary function. A unique, two-color design makes the book more user-friendly and emphasizes special features. Pedagogical features such as chapter outlines, introductions and summaries, learning objectives, and key terms are provided in each chapter to reinforce the material and help students identify important points. All key terms are listed in a glossary at the end of the book so readers can easily find definitions for new terms presented in the text. A new chapter on Cardiovascular Diagnostic Testing highlights areas such as cardiovascular monitoring, ECG, and hemodynamics, explaining equipment as well as the relevant physiology. The chapter on Infection Control is placed earlier in the textbook to better reflect the way most instructors teach the subject. Content on noninvasive positive pressure ventilation (NIPPV) has been added to the chapter on Transport, Home Care, and Alternative Devices (Chapter 14). Coverage of bronchoscopy has been added to the chapter on Airway Management (Chapter

6) so readers can explore the specifics of this important assessment technique. More NBRC-type review questions have been added so that every chapter now contains at least 20 review questions reflecting the types of questions and amount of coverage on the board exams. Critical-thinking questions are included to further reflect the book's clinical focus. More Clinical Rounds (previously entitled Decision Making & Problem-Solving boxes) have been added, containing problems that may be encountered during actual use of equipment. Suggested answers are included in the appendices.
