Bonding Before Birth Miriam Stoppard
2008-04-21 Bonding Before Birth combines up-to-the-minute research with enlightened and compassionate wisdom. This book explores what science knows about babies in the womb and explains why mother-baby bonding is so vital for the future well-being of mother, father, and baby. Dr. Miriam Stoppard writes about the feelings that expectant parents experience during the first, second and third trimesters and promotes the significance of rites of passage

through pregnancy, from adjusting to the changes that parenthood brings to celebrating your future as a family. The emotional and psychological elements of pregnancy are often overlooked in favor of hard facts and scientific evidence. This book redresses the balance and turns its attention to the conflicting feelings of exhilaration and anxiety, dreams and fears that so often characterize the nine months of pregnancy and gives parents-to-be inspiring guidance through these uncharted waters.

Neo-Hindutva Edward Anderson 2020-06-30
Neo-Hindutva explores the recent proliferation and evolution of Hindu nationalism – the assertive majoritarian, right-wing ideology that is transforming contemporary India. This volume develops and expands on the idea of ‘neo-Hindutva’ -- Hindu nationalist ideology which is evolving and shifting in new, surprising, and significant ways, requiring a reassessment and reframing of prevailing understandings. The contributors identify and explain the ways in

which Hindu nationalism increasingly permeates into new spaces: organisational, territorial, conceptual, rhetorical. The scope of the chapters reflect the diversity of contemporary Hindutva – both in India and beyond – which appears simultaneously brazen but concealed, nebulous and mainstreamed, militant yet normalised. They cover a wide range of topics and places in which one can locate new forms of Hindu nationalism: courts of law, the Northeast, the diaspora, Adivasi (tribal) communities, a powerful yoga guru, and the Internet. The volume also includes an in-depth interview with Christophe Jaffrelot and a postscript by Deepa Reddy. Helping readers to make sense of contemporary Hindutva, Neo-Hindutva is ideal for scholars of India, Hinduism, Nationalism, and Asian Studies more generally. This book was originally published as a special issue of Contemporary South Asia.

The Hindu Nationalist Movement in India
Christophe Jaffrelot 1996 Using techniques

similar to those of nationalist groups in other nations, Jaffrelot contends, the Hindu movement polarizes Indian society by stigmatizing minorities - chiefly Muslims and Christians - and by promoting a sectarian Hindu identity.

Science and Mathematics Jayant V. Narlikar

2021-11-30 This book offers an engaging and comprehensive introduction to scientific theories and the evolution of science and mathematics through the centuries. It discusses the history of scientific thought and ideas and the intricate dynamic between new scientific discoveries, scientists, culture and societies. Through stories and historical accounts, the volume illustrates the human engagement and preoccupation with science and the interpretation of natural phenomena. It highlights key scientific breakthroughs from the ancient to later ages, giving us accounts of the work of ancient Greek and Indian mathematicians and astronomers, as well as of the work of modern scientists like Descartes, Newton, Planck, Mendel and many more. The author also discusses the vast

advancements which have been made in the exploration of space, matter and genetics and their relevance in the advancement of the scientific tradition. He provides great insights into the process of scientific experimentation and the relationship between science and mathematics. He also shares amusing anecdotes of scientists and their interactions with the world around them. Detailed and accessible, this book will be of great interest to students and researchers of science, mathematics, the philosophy of science, science and technology studies and history. It will also be useful for general readers who are interested in the history of scientific discoveries and ideas.

Animal Cell Biotechnology Ralf Pörtner

2013-12-04 *Animal Cell Biotechnology: Methods and Protocols*, Third Edition constitutes a comprehensive manual of state-of-the-art and new techniques for setting up mammalian cell lines for production of biopharmaceuticals, and for optimizing critical parameters for cell culture from lab to final production. The volume is divided into five parts that reflect the processes required for different stages of production. In Part I, basic techniques for establishment of production cell lines are addressed, especially

high-throughput synchronization, insect cell lines, transient gene and protein expression, DNA Profiling and Characterisation. Part II addresses tools for process and medium optimization as well as microcarrier technology while Part III covers monitoring of cell growth, viability and apoptosis, metabolic flux estimation, quenching methods as well as NMR-based techniques. Part IV details cultivation techniques, and Part V describes special applications, including vaccine production, baculovirus protein expression, chromatographic techniques for downstream as well as membrane techniques for virus separation. Written in the successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible protocols, and notes on troubleshooting and avoiding known pitfalls. *Animal Cell Biotechnology: Methods and Protocols*, Third Edition provides a compendium of techniques for

scientists in industrial and research laboratories that use mammalian cells for biotechnology purposes.

Sexology in Midwifery Ana Polona Mivšek

2015-04-15 Midwives support women during the reproductive period of their lives. Dimensions of midwifery work include, in addition to the physiological aspect, psychological and spiritual issues. Midwifery activities mean involvement in the most intimate sphere of clients' lives.

Women's perceptions of partnership, sexuality, pregnancy and birth are affected by their personal experiences and by the culture they live in. The same factors also influence the midwives' perception of these issues. It is therefore crucial for the midwives to be aware of certain areas of their work that have a sexual inclination and clarify their own eventual prejudices regarding sexuality, since these can affect their provision of holistic, individual and competent care to women and their families. This book deals with different aspects of sexuality that can have an

influence on everyday midwifery work. It might also be of interest to different groups of people - midwives in clinical settings, midwifery educators, midwifery students and also other health professionals who manage women during the reproductive period.

The First Year Dr Lachlan Rathie Fanzca

2016-04-26 Some common clinical questions: -

What are the criteria for extubation? - What is the intubating dose of rocuronium for a patient who weighs 150kg? - How do I interpret a post tetanic count? - How do I manage a LMA with a leak? - What's the point of giving midazolam on induction? - Should I use a cuffed tube in a 4 year old? - How do I give a child a TIVA? - How do I intubate someone without muscle relaxants? - How do changes in cardiac output affect the induction dose of propofol? - Do I have to abandon my anaesthetic machine if there is a power board failure? This book answers those questions and a whole lot more. It is not an exam primer nor is it a comprehensive textbook of

anaesthesia. This is the book you give to the trainee specialist who is about to embark on their anaesthesia training. It contains the information they need to formulate and develop a safe practice of anaesthesia. This book lucidly describes and justifies the core knowledge, behaviours and practice that a junior trainee would be expected to possess after a year of anaesthesia. Written specifically for Australasian anaesthetic trainees and GP registrars doing their JCCA advanced skills post, this book fills the gaping hole in the existing anaesthetic literature. This book aspires to take the relevant bits of a pharmacology textbook, a physiology textbook, a clinical anaesthesia textbook, an anaesthetics emergency manual and a perioperative medicine guide and tie them together in a succinct but sufficiently detailed volume. This book has been written with the intention of being relevant, up to date, pragmatic and entertaining. Written by a former rural GP, now Senior Staff Anaesthetist,

Supervisor of Training and incorrigible cynic; this is the book he would have liked to have when he embarked on his First Year. Cast Away William Broyles 2001-02-22 Cast Away began in 1994 when Fox executive Elizabeth Gabler told me that Tom Hanks thought there might be a movie in the story of a modern man stranded on a desert island...which Tom jokingly called 'Chuck of the Jungle'. So begins William Broyles, Jr.'s fascinating introduction, written exclusively for this book, about the process and challenges inherent in writing a screenplay that was not, by design, going to have a lot of dialogue in it, and about his collaboration with two extraordinarily gifted artists, actor Tom Hanks and director Robert Zemeckis. Broyles's introduction shows how a movie and its story evolve, shift, and shape while the creators grapple with all manner of internal and external choices: from developing what was Tom Hanks's idea into a story, and building a narrative structure and thematic threads into a

screenplay, to researching the details of the specific - and ironic - situation of a FedEx executive stranded on a desert island.

Looptail Bruce Tip 2014-04-03 *Looptail* is Bruce Poon Tip's extraordinary first-person account of his entrepreneurial instincts to start and develop G Adventures, the highly successful international travel adventure company - and along the way he reveals his unusual management secrets that not only keep his employees fully engaged and energized but also keep his customers extremely happy. His unique approach has worked in marvellous ways. Poon Tip has created an entirely new and refreshing approach to management. For example, there is no CEO at G Adventures - instead, every employee is a CEO, empowered to make instantaneous decisions to help clients on the spot. But while there's no CEO, there is a company Mayor, who take the pulse of corporate morale. There's no HR department - but there is a Talent Agency and company Culture Club. It hasn't always been

easy to try to balance his desire for a socially responsible company along with the desire to generate profits. But thanks to Poon Tip's vision, G Adventures has flourished and has done its best to maintain its looptail approach. In short, it's been an extraordinary ride, and in many ways G Adventures is at the vanguard of what modern-day companies are beginning to look like.

To Advance Knowledge Roger L. Geiger
2017-09-29 American research universities are part of the foundation for the supremacy of American science. Although they emerged as universities in the late nineteenth century, the incorporation of research as a distinct part of their mission largely occurred after 1900. To Advance Knowledge relates how these institutions, by 1940, advanced from provincial outposts in the world of knowledge to leaders in critical areas of science. This study is the first to systematically examine the preconditions for the development of a university research role. These

include the formation of academic disciplines--communities that sponsored associations and journals, which defined and advanced fields of knowledge. Only a few universities were able to engage in these activities. Indeed, universities before World War I struggled to find the means to support their own research through endowments, research funds, and faculty time. *To Advance Knowledge* shows how these institutions developed the size and wealth to harbor a learned faculty. The book illustrates how arrangements for research changed markedly in the 1920s when the great foundations established from the Rockefeller and Carnegie fortunes embraced the advancement of knowledge as a goal. Universities emerged in this decade as the best-suited vessels to carry this mission. Foundation resources made possible the development of an American social science. In the natural sciences, this patronage allowed the United States to gain parity with Europe on scientific frontiers, of which the most

important was undoubtedly nuclear physics. The research role of universities cannot be isolated from the institutions themselves. *To Advance Knowledge* focuses on sixteen universities that were significantly engaged with research during this era. It analyzes all facets of these institutions--collegiate life, sources of funding, treatment of faculty--since all were relevant to shaping the research role.

Dongri to Dubai - Six Decades of the Mumbai Mafia Hussain Zaidi 2012-08-10 Dongri to Dubai is the first ever attempt to chronicle the history of the Mumbai mafia. It is the story of notorious gangsters like Haji Mastan, Karim Lala, Varadarajan Mudaliar, Chhota Rajan, Abu Salem, but above all, it is the story of a young man who went astray despite having a father in the police force. Dawood Ibrahim was initiated into crime as a pawn in the hands of the Mumbai police and went on to wipe out the competition and eventually became the Mumbai police's own nemesis. The narrative encompasses several

milestones in the history of crime in India, from the rise of the Pathans, formation of the Dawood gang, the first ever supari, mafia's nefarious role in Bollywood, Dawood's move to Karachi, and Pakistan's subsequent alleged role in sheltering one of the most wanted persons in the world. This story is primarily about how a boy from Dongri became a don in Dubai, and captures his bravado, cunningness, focus, ambition, and lust for power in a gripping narrative. The meticulously researched book provides an in-depth and comprehensive account of the mafia's games of supremacy and internecine warfare.

The Geography of Black Pepper (Piper nigrum) Kodoth Prabhakaran Nair 2020-09-01 This book considers all aspects of black pepper from its growth, as a flowering vine, to how the dried fruit (peppercorn) is used as a spice and traded as a commodity. It is the economic mainstay of several India states and, principally, in Kerala

State, with the Indian subcontinent being the largest black pepper producer. Indonesia has also emerged as a large producer of black pepper. Black pepper commands a leading position among the spices and has an immense commercial importance to world trade, finding its way onto the dining table of millions around the world, on the European and North American continents, and Japan. The use of black pepper ranges from a simple dietary component and flavour enhancer, to that of a spice with huge pharmacological benefits.

Studia Instrumentorum Musicae Popularis

Gisa Jähnichen 2009 "The New Series of the ICTM Study Group Journal STUDIA INSTRUMENTORUM MUSICAE POPULARIS starts with a broad overview on the topics "Percussion" and "Migration of Musical Instruments", an outcome of the 17th Meeting of

the Study Group on Folk Musical Instruments, held in Erkner near Berlin from April 1-4, 2009. 25 scholars from 15 countries contributed articles to the volume, which appear in their alphabetical order due to the fact that clear borders cannot and should not be delineated. Moreover, the editors leave it to the readers' community to discuss hierarchies regarding their importance or their qualitative refinement for discussion and further improvements are the main aim of the publication. Since 1969, when the Musikhistoriska museet in Stockholm has published its first volume of the journal, edited by Erich Stockmann, many fields of organological research have changed their methodological repertoire, their interdisciplinary tools and especially their non-instrumental focus on complex subjects. Nevertheless, classical working methods are still highly esteemed as a basic precondition for detailed discoveries using modern technology and external expertise. The volume comprises papers of authors, who

already contributed to the journal's former series in their youth, as well as those of authors with their first journal publication, who are just starting to explore their scientific scope. Thus this volume brings together generations of scholars with different experiences and their open minded curiosity about each other. Challenging discussions and a wide field of interdisciplinary connections enriched their outcomes and will help to create new scientific spaces beyond the tangibility of musical instruments and the intangibility of musical sound."--Publisher description.

Plant Genetic Resources of Legumes in the Mediterranean Nigel Maxted 2013-03-14

Genetic erosion, that is, the loss of native plant and genetic diversity has been exponential from the Mediterranean Basin through the Twentieth century. This careless eradication of species and genetic diversity as a result of human activities from a 'hot-spot' of diversity threatens sustainable agriculture and food security for the

temperate regions of the world. Since the early 1900s there has been a largely ad hoc movement to halt the loss of plant diversity and enhance its utilisation. The Convention on Biological Diversity and Food and Agriculture Organisation of the United Nations International Undertaking on Plant Genetic Resources, both highlight the need to improve conservation methodologies and enhance utilisation techniques. It has been argued that the most important component of biodiversity is the genetic diversity of crop and forage species used to feed humans and livestock. These cultivated and related wild species provides the raw material for further selection and improvement. Leguminosae species are of major economic importance (peas, chickpeas, lentils and faba beans, as well as numerous forage species) and provide a particularly rich source of protein for human and animal foods. Their distribution is concentrated in the Mediterranean region and therefore the improvement of their conservation and use in

the region is critical. This text is designed to help ensure an adequate breadth of legume diversity is conserved and to help maximise the use of that conserved diversity. The subjects of conservation and use of legume diversity, the Mediterranean ecosystem and taxonomy of legumes are introduced. Generic reviews of the taxonomy, centre of diversity, ecogeographic distribution, genetic diversity distribution, conservation status, conservation gaps and future research needs are provided, along with a discussion of the importance of rhizobia to the maintenance of legume diversity. Current ex situ and in situ conservation activities as well current legume uses are reviewed. In conclusion future priorities for ex situ and in situ plant genetic conservation and use of Mediterranean legumes are highlighted. All contributors look forward rather than simply reviewing past and current activities and therefore it is hoped that the identification of genetic erosion, location of taxonomic and genetic diversity and promotion

of more efficient utilisation of conserved material will be enhanced.

Education and Learning to Think Division of Behavioral and Social Sciences and Education 1987-02-01 The economic and social challenges confronting the nation today demand that all citizens acquire and learn to use complex reasoning and thinking skills. Education and Learning to Think confronts the issues facing our schools as they take on this mission. This volume reviews previous research, highlights successful learning strategies, and makes specific recommendations about problems and directions requiring further study. Among the topics covered are the nature of thinking and learning, the possibilities of teaching general reasoning, the attempts to improve intelligence, thinking skills in academic disciplines, methods

of cultivating the disposition toward higher order thinking and learning, and the integral role motivation plays in these activities.

Classroom Discourse Courtney B. Cazden
2001 When Courtney Cazden wrote *Classroom Discourse*, she provided such a cogent picture of what the research tells us about classroom language that the book quickly became a classic and shaped an entire field of study. Although other books since have addressed classroom language, none has matched Cazden's scope and vision. Now, thirteen years later, we've witnessed such significant changes in social and intellectual life that the subject of classroom discourse is more important than ever. So Cazden has revisited her classic text and

integrated current perspectives and research. New features include: a new rationale for the importance of student-teacher talk: the importance of oral as well as written communication skills in today's occupations and current conceptions of knowledge and the way it is acquired rich new examples of talk in K-12 classrooms - math as well as language arts - with transcriptions and analyses new findings from teacher researchers as well as university researchers new emphasis on achieving greater equity in what students learn new material on the kind of interactions computers offer new section on learning new forms of discourse as a significant educational goal for all students. Readers will emerge from the book with a better understanding of the significance of quality teacher-student talk and some of the most important research and researchers.
