Traveler's Guide to

World Radio Andrew G. Sennitt 1991 This work offers details of radio broadcasts in English in major international travel destinations in a handy size and graphic format. Arranged by city, the book shows the reader at a glance: local AM-FM broadcasts in English; the schedules and frequencies of such major shortwave broadcasters as the BBC and Voice of America (shown graphically on a grid); essential travel information; additional detailed schedule information; essential travel information - local language, electric current, telephone country prefix. The book is designed to aid the travelling executive in relocating and listening to programmes of interest during overseas trips.

transmitters were relocated to Portishead, near Bristol, shortly after the receiving station was moved to Highbridge, Somerset during the 1920s. The station, originally operated by the British Post Office, provided vital communication links both to and from ships at sea, using Wireless Telegraphy (Morse code), Radiotelephony, and latterly, Radiotelex. The developmental and war years are recounted in detail, as well as the rise (and eventual fall) of commercial maritime radio traffic over 80 years of service. The aeronautical and leisure markets are recalled, as well as other services provided by the station. The station closed in 2000, as satellite technology became the preferred method of ship-to-shore communication. This book gives both a technical and social history of the station; how it worked, what it was like to work there, and

fondly recalls many of the stories and characters who became part of the station's charm. Using many photographs, staff memories, and with recently-found magazine and newspaper articles, the complete history of this important and much-missed station can be told for the first time. Jamming the Media Gareth Branwyn 1997 "Write and distribute a zine; produce cable-access TV; get your message out on the Internet; release your own CDs; work your magic on the Web; communicate across all borders with pirate radio; make your own films, from video to 8mm and beyond; wreak havoc with media pranking and activism; say it loud with multimedia" --back cover.

normal kid, from a normal American town. But around the age of 12 he got interested in electronics, and he has never been the same. To make matters worse, when he got older he became a diplomat. His work has taken him to Panama, Honduras, El Salvador, the Spanish Basque Country, the Dominican Republic, the Azores islands of Portugal, London, and, most recently, Rome. In almost all of these places his addiction to electronics caused him to seek out like-minded radio fiends, to stay up late into the night working on strange projects, and to build embarrassingly large antennas above innocent foreign neighborhoods. SolderSmoke takes you into the basement workshops and electronics parts stores of these exotic foreign places, and lets you experience the life of an expatriate geek. If you are looking for restaurant or hotel recommendations, look elsewhere. But if you

need to know where to get an RF choke re-wound in Santo Domingo, SolderSmoke is the book for you. SolderSmoke is no ordinary memoir. It is a technical memoir. Each chapter contains descriptions of Bill's struggles to understand (really understand) radio-electronic theory. Why does $P=IE$? Do holes really flow through transistors? What is a radio wave? How does a frequency mixer produce sum and difference frequencies? If these are the kinds of questions that keep you up at night, this book is for you. Finally, SolderSmoke is about brotherhood. International, cross-border brotherhood. Through the SolderSmoke podcast we have discovered that all around the world, in countries as different as Sudan and Switzerland, there are geeks just like us, guys with essentially the same story, guys who got interested in radio and electronics as teenagers, bucksandjakes.com on

stuck with it ever since. Our technical addiction gives us something in common, something that transcends national differences. And our electronics gives us the means to communicate. United by a common interest in radio, and drawn closer together by means of the internet, we form an "International Brotherhood of Electronic Wizards."

Flying The Big Jets (4th Edition) Stanley Stewart

2014-09-30 Flying the Big Jets presents the facts that people want to know about the world of the big jets. How does a large aircraft fly? How long is the take-off run at maximum weight? How much fuel is carried on a transatlantic flight? How do the radios work? What aircraft maintenance is required? How often are the tyres

changed? What is the life style of a pilot? The answers to these and a thousand other questions are given in sufficient detail to satisfy the most inquisitive of readers. Chapter by chapter the reader is taken gently from the basics of the big jets to the sophistication of the 'glass cockpit' in preparation for the pilot's seat on a Boeing 777 flight from London to Boston. Flying the Big Jets is a comprehensive book that reveals as never before the every-day working environment of the modern long-haul airline pilot. "Written by a pilot with over 15,000 flying hours on heavy jets during a 30-year career in commercial aviation, this title is a comprehensive text book taking the reader into the 'glass cockpit' of a Boeing 777. It is also a guide to the principles of flight, the art of navigation and meteorology, and an appreciation of the role played by

**Passport to World Band
Radio 1994** Lawrence
Magne 1993-09-29 With
hundreds of world band
shortwave radio stations
on the air, this book
makes it easy to tune in
news, sports, and
entertainment from
Arabia to Yugoslavia--
the listings are hour-
by-hour, country-by-
country and channel-by-
channel. Includes
ratings of world band
radios and helpful how-
to articles. 125 photos.

**The Early Shortwave
Stations** Jerome S. Berg

2013-09-20 In July 1923,
less than three years
after Westinghouse
station KDKA signed on,
company engineer Frank
Conrad began regular
simulcasting of its
programs on a frequency
in the newly-discovered
shortwave range. It was
an important event in a
technological revolution
that would make
dependable worldwide
radio communication
possible for the first
time. In subsequent
years, countless
stations in practically
all countries followed
suit, taking to
shortwave to extend
reception domestically
or reach audiences
thousands of miles away.
Shortwave broadcasting
would also have an
important role in World
War II and in the Cold
War. In this, his fourth
book on shortwave
broadcast history, the
author revisits the
period of his earlier
work, *On the Short
Waves, 1923-1945*, and
focuses on the stations
that were on the air in
those early days. The
year-by-year

chronicles the birth and operation of the large international broadcasters, as well as the numerous smaller stations that were a great attraction to the DXers, or long-distance radio enthusiasts, of the time. With more than 100 illustrations and extensive notes, bibliography and index, the book is also a valuable starting point for further study and research.

Passport to World Band Radio 1993 Lawrence Magne 1992 This #1 selling compendium makes it easy for the millions of Americans who participate in world-band radio to tune in news, sports, and entertainment from Arabia to Zimbabwe. Richly illustrated with strong graphics and pull quotes to capture the browser's interest, Passport tells what's on when hour-by-hour, country-by-country, and channel-by-channel.

World Radio TV Handbook 2022 : The Directory of Global Broadcasting
2021-12-08 "World Radio

TV Handbook is the world's most accurate and comprehensive directory of global broadcasting. It contains full details by country of radio broadcasts and broadcasters on LW, MW (AM), SW and FM, and details of national TV. The Features section for this 76th edition includes articles on the Further Development of HF Transmitters, the history of Radio in Lesotho, Over 75 Years With My Radio by Ullmar Qvick, Technical Monitoring at VOA by Bill Whitacre, and the history of KTWR on Guam, as well as other regular articles and world maps. There are also reviews of the latest equipment including Sangean's ATS-909x2, Icom's IC-705, the Tecsun H-501 and Tecsun PL-330, Cross Country Wireless's loop antenna amplifier, and the ATS25 Si4732. The remaining pages are full of information on National and

International broadcasts and broadcasters.
