### The Illustrated Herdwick

Shepherd James Rebanks

2019-02-07 I am the luckiest man alive, because I get to live and work in the most beautiful place on earth: Matterdale in the English Lake District. When I was a child we didn't really go anywhere, except a week in the Isle of Man when I was about ten years old, and I never left Britain until I was twenty. Even now, years later, the best bit of any travelling is coming home.

Bringing us into the world of shepherd's baking competitions, sheep shows and moments out on the fell watching the sheep run away home, James Rebanks interweaves thoughts and reflections on the art of shepherding with his photographs of the valley, people and animals that make up the

daily life of the fells. A life lived by the three hundred surviving fell farming families, this is a book of photos and words filled with reverence and love.

### **Joint Replacement Technology**

Peter A. Revell 2021-08-09

The third edition of Joint

Replacement Technology

provides a thoroughly updated review of recent developments in joint replacement technology.

Joint replacement is a standard treatment for joint degradation and has improved the quality of life of millions of patients.

Collaboration between clinicians and researchers is critical to its continued success and to meet the rising expectations of patients and surgeons. This edition covers a range of updated and new content, ranging from chapters on materials analysis and selection, to methodologies and techniques used for joint replacement and clinical challenges of replacing specific joints. Key topics include

tribological considerations and experiments; challenges in joint bearing surfaces; cementless fixation techniques; healing responses to implants. Clinical challenges and perspectives are covered with the aid of case studies. Thanks to its widespread collaboration and international contributors, Joint Replacement Technology, Third Edition is useful for materials scientists and engineers in both academia and the biomedical industry.

Chemists, clinicians, and other researchers in this area will also find this text invaluable. This third edition provides an updated comprehensive review of recent developments in joint replacement technology.

Reviews a range of specific joints, biological and mechanical issues and fixation techniques. Includes revised and new content, such as sections on regulatory affairs, AI techniques and 3D printing.

Looptail Bruce Tip 2014-04-03

Looptail is Bruce Poon Tip's

extraordinary first-person account of his entrepreneurial instincts to start and develop G Adventures, the highly successful international travel adventure company - and along the way he reveals his unusual management secrets that not only keep his employees fully engaged and energized but also keep his customers extremely happy. His unique approach has worked in marvellous ways.

Poon Tip has created an entirely new and refreshing approach to management. For example, there is no CEO at G Adventures - instead, every employee is a CEO, empowered to make instantaneous decisions to help clients on the spot. But while there's no CEO, there is a company Mayor, who take the pulse of corporate morale. There's no HR department - but there is a Talent Agency and company Culture Club. It hasn't always been easy to try to balance his desire for a socially

company along with the desire to generate profits. But thanks to Poon Tip's vision, G Adventures has flourished and has done its best to maintain its looptail approach. In short, it's been an extraordinary ride, and in many ways G Adventures is at the vanguard of what modern-day companies are beginning to look like.

Creative Solutions for a Sustainable Development Yuri Borgianni 2021-09-15 This book constitutes the refereed proceedings of the 21st International TRIZ Future Conference on Automated Invention for Smart Industries, TFC 2021, held virtually in September 2021 and sponsored by IFIP WG 5.4. The 28 full papers and 8 short papers presented were carefully reviewed and selected from 48 submissions. They are organized in the following thematic sections: inventiveness and TRIZ for sustainable development; TRIZ,

intellectual property and smart technologies; TRIZ: expansion in breadth and depth; TRIZ, data processing and artificial intelligence; and TRIZ use and divulgation for engineering design and beyond. Chapter 'Domain Analysis with TRIZ to Define an Effective "Design for Excellence"' is available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](http://link.springer.com).

**Re-Presenting 'Jane' Shore** Maria M. Scott 2018-01-18 Re-Presenting 'Jane' Shore analyzes the representation of the mistress of Edward IV of England, known to us as 'Jane' Shore (c. 1445-c. 1527). The daughter of a well-to-do merchant, she left her merchant husband to become the king's concubine. After Edward's death, his brother, later Richard III, charged her with witchcraft and harlotry, prompting Thomas More to include her in his exposition of Richard's perfidies in *The History of*

Since then, Jane Shore has been a frequent subject of, among others, poets (Thomas Churchyard and Thomas Deloney), playwrights (Shakespeare and Nicholas Rowe), and novelists (Guy Padget and Jean Plaidy). Scott examines the anxiety in Anglo-American culture generated when sex and politics intersect, using the case of 'Jane' Shore to show how history is compromised and complicated by context. In doing so, she reveals how women continue to be deployed as symbols rather than as actors on the larger stage of the drama that is politics.

**Nitrogen Assessment** Tariq Aziz 2021-12-01 Nitrogen Assessment: Pakistan as a Case-Study provides a detailed overview of issues and challenges related to nitrogen use and overuse, thus serving as a reference for researchers in Pakistan and providing important insights for other geographic regions. Excess and inefficient nitrogen use in crops and

livestock sectors is polluting our rivers, seas, atmosphere, and ecosystems, contributing to climate change, hampering biodiversity, and contributing to stratospheric ozone depletion.

This book covers the importance of nitrogen in relation to food security, human health, and economic stability in South Asia. It also discusses nitrogen status, sources, sinks, and drivers of nitrogen use in Pakistan, focusing on current nitrogen measures and policies. Nitrogen pollution is one of the biggest challenges of 21st Century, and the international scientific community is beginning to recognize the significance of nitrogen pollution and to explore how to combat it. The editors' institution, University of Agriculture, Faisalabad, partners with South Asia Nitrogen Hub, which includes about 30 organizations from South Asia and UK working on nitrogen assessment, budget

Nitrogen Assessment: Pakistan as a Case-Study provides an important guide to this work and is written in a way that is accessible to an audience with a wide range of experience from advanced students to seasoned researchers. Presents an excellent compilation of research-based findings in the first comprehensive assessment of nitrogen use in Pakistan Offers a detailed and comprehensive compilation of data and content from a variety of sources Analyzes important translational insights for other geographic regions seeking to maximize nutrient use efficiency

*The Winning Way* Brian Tracy  
2014-04-15 By definition, winning means that you competed and you came out ahead. Human nature requires us to compete in order to survive. Therefore, winning and survival

have the element of success in common. To ascend to a winning position, you need a goal, a desire to achieve it, and the qualities of discipline, perseverance and action to attain it. Having your goal and setting yourself up to achieve your goal is the first step in the process. You adjust your mindset and begin to plan diligently. Goals may be as different as DNA, but methodologies have much in common. Furthermore, your plans and expectations will need adjustments as you go along. That is why the knowledge shared by the CelebrityExperts(r) in this book will be of importance to you. The advice and suggestions of these CelebrityExperts(r) are based on their experiences - both their accomplishments and their shipwrecks. The knowledge they share will allow you to make plans that can propel you in the right direction. That is the function of a mentor - to guide you where you are

advise what to avoid. If you wish to develop The Winning Way to your goals, read on... You will never win if you never begin.

### **Methanol and the Alternate Fuel Economy**

Avinash Kumar Agarwal 2018-11-01 This book discusses the emerging research centred on using methanol- whose excellent fuel properties, easy production and relative compatibility with existing technology- make it attractive to researchers looking to alternative fuels to meet the rising energy demand. The volume is divided into broadly 4 parts which discuss various aspects of the proposed methanol economy and the technological advances in engine design for the utilisation of this fuel. This book will be of interest to researchers and policy makers interested in using methanol as the principal source of ready and stored energy in societal functioning.

Concrete (HFC). The expression "Hybrid" refers to the "hybridisation" of fibres: short and long steel fibres were combined together in one concrete mixture. This is opposite to conventional steel fibre concretes, which contain only one type of fibre. The basic goal of combining short and long fibres is from one side to improve the tensile strength by the action of short fibres, and from the other side to improve the ductility by the action of long fibres." "In this research project, all important aspects needed for the development and application of Hybrid-Fibre Concrete have been considered. In total 15 mixtures, with different types and amounts of steel fibres were developed and tested in the fresh state (workability) as well as in the hardened state (uniaxial tensile tests, flexural tests, pullout tests of single fibres and compressive tests). A new analytical model for bridging of cracks by fibres was developed

and successfully implemented for tensile softening response of HFC. At the end, the utilisation of HFC in the engineering practice was discussed, including a case-study on light prestressed long-span beams made of HFC."--BOOK JACKET.

*Methanol* Avinash Kumar Agarwal 2021-05-22 This monograph focuses on methanol and its utilization in transportation sector, namely in spark ignition (SI) engines. The contents focus on methanol production and presents a variety of production technologies from different feedstocks. The potential of methanol utilization in transportation in SI engines is discussed, its challenges, limitations, aspects related to its utilization and current global use of methanol are also presented. The book also contains chapters related to pollutant formation and exhaust emissions from methanol fuelled SI engines, one chapter is focused specifically

### **Physical Methods in Agriculture**

Jirí Blahovec 2012-12-06 The first attempts to use physical methods in agriculture can be found in nineteenth century as a necessary component of farm and food machinery. There were mechanics, electricity and physical chemistry that were the first physical disciplines used in agriculture and food industry. In the same time period the studies on physical properties of soils

started to be one of main topics of soil science. The twentieth century was a century of research on physical properties of agromaterials. The physical properties of agromaterials have been studied e. g. in the USA, where a big role has been played by ASAE (1907), and in the Soviet Union where the special Institute of Agrophysics was founded (1932) by Academician Ioffe. The ASAE's activity was enlarged in 1960s and 1970s, especially with the role playing by the Mohsenin's group and its followers. At that time the Institute of Agrophysics of Polish Academy of Sciences was founded in Lublin and conferences on physical methods in agriculture began to be organised. The participants of the last conference - "Physical Methods in Agriculture - Approach to Precision and Quality", held on August 27-30, 2001, have prepared the basis for this book. Part of the

participants decided to enlarge their conference papers to be more general and more instructive in relation to further development of the science. New papers prepared under this decision were reviewed, discussed and revised, repeatedly, to be presented in this book.

**Alternative Fuels and Their Utilization Strategies in Internal Combustion Engines**

Akhilendra Pratap Singh 2019-10-10 This book covers alternative fuels and their utilization strategies in internal combustion engines. The main objective of this book is to provide a comprehensive overview of the recent advances in the production and utilization aspects of different types of liquid and gaseous alternative fuels. In the last few years, methanol and DME have gained significant attention of the energy sector, because of their capability to be utilized in different types of engines. This book will be a valuable resource for researchers

and practicing engineers alike.

**The Bigger Book of John Deere Tractors**

Don Macmillan 2010-05-01 The Bigger Book of John Deere Tractors is a model-by-model encyclopedia of John Deere tractors from their first appearance in 1892 to the latest, 2009 models. Photographs showcase beautifully restored tractors as well as unique paintings and artwork from the Deere archives, rare and valuable original brochures, and studio photos of John Deere toys and models. For tractor enthusiasts, John Deere aficionados, and devotees of American farm machinery at its finest, this big book is an unparalleled compendium of pictures and facts, the best look ever at the incomparable John Deere.

aspects related to utilization of alternative fuels in internal combustion (IC) engines with a focus on biodiesel, dimethyl ether, alcohols, biogas, etc. The focal point of this book is to present engine combustion, performance and emission characteristics of IC engines fueled by these alternative fuels. A section of this book also covers the potential strategies of utilization of these alternative fuels in an energy efficient manner to reduce the harmful pollutants emitted from IC engines. It presents the comparative analysis of different alternative fuels in a variety of engines to show the appropriate alternative fuel for specific types of engines. This book will prove useful for both researchers as well as energy experts and policy makers.

specifically for compression ignition (CI) engines. The contents present examples of utilization of methanol as a fuel for CI engines in different modes of transportation such as railroad, personal vehicles or heavy duty road transportation. The book also focuses on effect of methanol on combustion and performance characteristics of the engine. The effect of methanol on exhaust emission production, prediction and control is also discussed. It also discusses current methanol utilization and its potential, its effect on the engine in terms of efficiency, combustion, performance, pollutants formation and prediction. Part of the chapters are based on review of state-of-the-art while other chapters are dedicated to an original research.
